For each country, the following information is provided: the total number of cases, the number of deaths, the number of cases per 100,000 population, and the number of deaths per 100,000 population.

1. The first step in the process of creating a new product is to identify a market need. This involves conducting market research to understand the preferences and behaviors of potential customers. Once a need is identified, the next step is to develop a concept that addresses this need. This concept should be unique and offer a clear value proposition. The third step is to create a prototype, which allows the team to test the concept and gather feedback from potential users. Finally, the product is refined based on this feedback and then launched into the market. Throughout this process, it is crucial to maintain open communication with the target audience to ensure the product remains relevant and valuable.
