**Marine Ecosystem Assessment for the Southern Ocean: Meeting the Challenge for Conserving Earth Ecosystems in the Long Term** Monica M. C. Muelbert, 2024-12-24 National and international agencies need assessments of change in ecosystems and their drivers in order to sustain natural systems to maintain the delivery of services and to meet the challenge for conserving Earth ecosystems in the long term In marine systems change may arise directly from human activities e g fisheries indirectly from local or global activities cascading effects through food webs from fisheries or changing environments from climate change and or ocean acidification or from naturally varying processes A particular challenge for managers is to identify how dangerous future climate change will be for ecosystems and their services and whether mitigation or adaptation may be needed in advance in order to achieve the conservation requirements For regions of international attention particularly those that have the attention of many management or policy oriented bodies a standardized process is needed to harmonize the scientific information on the status and trends in ecosystems used by the different bodies That process also needs to ensure the information is available in a timely manner For example assessments of change in habitats species and or food webs in the Southern Ocean are currently compiled separately for at least ten different international organizations or processes A Marine Ecosystem Assessment for the Southern Ocean MEASO aims to harmonize that information for policy makers This assessment began with an international conference in April 2018 <http://www.measo2018.aq> where it was agreed to undertake the first MEASO over 2018-2019 with the view to provide the outcomes to relevant bodies such as the Scientific Committee for the Conservation of Antarctic Marine Living Resources soon after

**Bridging the Theories of Affordances and Limb Apraxia** Antonello Pellicano, Anna M. Borghi, Ferdinand Binkofski, 2017-08-14 Download PDF Download EPUB Affordances are meaningful relations between the features of observed objects and the observer's action systems with its proper abilities The notion of affordance integrates perceptual cognitive and motor functions so that perceiving an object conducting cognitive operations on it and executing motor actions with it cannot be considered as independent functions Limb apraxia is a higher order motor disorder that refers to disturbance of one or more of three domains imitation of meaningless gestures pantomime of meaningful gestures and disturbance of interaction with objects The first aim of the Research Topic was to put together theoretical and research contributions on affordance mechanisms to highlight their role in explaining apraxia deficits The second aim was to clarify how studies on apraxia have implications for theories of affordances
