eighteen books including *A New Kind of Apologist* I can't think of a more relevant or more needed book for parents raising kids in today's culture. This book on apologetics will lead parents in critical conversations that will help grow and guide kids to be lifelong followers of Christ. Kristen Welch, author of *Raising Grateful Kids in an Entitled World*. Hey parents, do you want to reduce the chances that your child will follow the crowd to the point of rejecting Christ and the values and truths you hold so dearly? Then you need to have the conversations that Natasha Crain so brilliantly describes in this book. Prevent heartbreak later by reading and heeding this book now. Frank Turek, PhD, president of CrossExamined Ministries and author of *I Don't Have Enough Faith to Be an Atheist* and *Stealing from God*. May this book lead to thousands more Moms and Dads engaging with their kids through an intelligent faith. And may there be tens of thousands more kids who feel loved because the adults in their lives take their questions seriously. Jeff Myers, PhD, president, Summit Ministries.

The Complete Guide to Growing Vegetables, Flowers, Fruits, and Herbs from Containers Lizz Shepherd, 2011. Not everyone has the benefit of a plot of land where they can create a garden. In fact, almost 25% of city homeowners lack the yard space needed to cultivate and grow a decent sized garden. According to Seattle Lawn and Garden, meaning more and more people interested in harvesting flowers, vegetables, and herbs are turning to containers. The options provided by containers are plentiful, from bringing your tomato plants inside during the winter to being able to rearrange them if you are doing construction or playing a game outside. But getting crops to grow effectively in containers is another matter entirely. This book will provide every potential container gardener with the necessary steps and resources needed to grow their very own crops to thrive in any conditions. From the very outset, you will learn about how vegetables, flowers, and herbs grow naturally; charts will provide you with a detailed breakdown of how plants grow and what they need to grow effectively from root space to water consumption. Companion planting for small spaces will show you how the plants will survive with other plants in the same container and which plants can even be placed in confined spaces and survive. The basics of container planting, including the best single plant, containers two, three, and four plant combinations, are provided to help you decide how to lay out your container garden. The top gardeners were contacted and interviewed, providing highly insightful information that guides you through how container potted plants grow and thrive. You will learn the basics of side-planted containers and how succulents perform in these closed spaces. The best container plants are listed in order along with the necessary tools they need to survive. The best container sizes, soil types, fertilizer, climate information, and pest prevention methods are all given as well to help round out your container planting. Regardless of your needs or methods, this guide will take you through every step necessary to get your container plants growing and thriving.
