Introduction to SIMAN V and CINEMA V Jerry Banks, Barry B. Burnette, Henry Kozloski, James D. Rose, 1994-12-13 SIMAN is a simulation language used throughout the world much like GPSS and SLAM In industrial engineering SIMAN and SLAM are the dominant simulation languages Unequal Eugenia Cheng, 2025-09-02 Why the familiar equal sign isn't just a marker of sameness but a gateway into mathematics and humanity's most profound questions Math is famous for its equations $1 + 1 = 2$ $a^2 + b^2 = c^2$ or $y = mx + b$ Much of the time it can seem like that's all mathematics is following steps to show that what's on one side of an equation is the same as what's on the other In *Unequal* Eugenia Cheng shows that's just part of the story and the boring part to boot Mathematics isn't only about showing how numbers and symbols are the same It isn't even just about numbers and symbols at all but a world of shapes symmetries logical ideas and more And in that world the boundary between things being equal and unequal is a gray area or perhaps a rainbow of beautiful vibrant subtly nuanced color As *Unequal* shows once you go over that rainbow almost everything can be considered equal and unequal at the same time whether it's shapes seen from the right perspective a circle is the same as an ellipse words synonyms or people even numbers It all depends on what features we care about And it's up to us what we do about it That's because mathematics isn't a series of rules facts or answers It's an invitation to a more powerful way of thinking **Learning Statistics with R** Daniel
