**Modi And The World: (Re) Constructing Indian Foreign Policy** Sinderpal Singh, 2017-02-16 Contrary to prior expectations Narendra Modi has expended a significant amount of time energy and political capital in conducting India's engagement with the outside world since becoming Prime Minister in May 2014 In accordance with wider perceptions about Modi there were expectations of significant if not radical change in Indian foreign policy under his charge This sentiment led to a section of Indian strategists and foreign policy watchers conceiving the notion of a Modi Doctrine in Indian foreign policy This notion of foreign policy doctrines is not new to the analysis of Indian foreign policy Previous incarnations include the Indira Doctrine of the 1970s the Gujral Doctrine for a brief period in the late 1990s and the Manmohan Doctrine in the period before Modi was elected as prime minister This edited volume attempts to interrogate the extent to which Indian foreign policy under Modi has undergone significant change and the extent to which this manifests itself as a new doctrine in Indian foreign policy The individual chapters cover key bilateral relationships the United States China Australia and Pakistan as well as broader regional relationships South Asia and the Indian Ocean Region and specific themes such as economic diplomacy

**Strategy for the Global Market** Vladimir Kvint, 2015-10-05 In the twenty first century the global community constantly strives to bring structure and order to the world through strategic means From the highest levels of governments and militaries to multilateral institutions NGOs and corporations a strategy for the future of a company region country or even the world is tantamount to success Yet few understand what strategy actually is and how it can be developed planned and implemented Strategy for the Global Market combines a fundamental study of the theory of strategy with its practical applications to provide a new approach to the global emerging market Due to the technological transformations in communications and transportation and the birth and development of both the global community and the global marketplace over the past twenty years the world's population and corporations are in much closer contact with their counterparts across the globe than ever before This has led to increasing competition and even rivalries Understanding the strategic environment as well as solving problems either through amicable means or conflict requires the powerful instrument of strategy to remain efficient and to triumph Features of this book include Methodology and practical recommendations for all stages of developing and implementing strategy A comprehensive guide with explanations and descriptions for the preparation and orderly compilation of all necessary strategy documents Real world examples taken from corporate government and military strategizing practices in emerging market countries and the global marketplace This book should be on the desk of every national regional and military leader corporate executive manager and student of strategy CAFTA-DR, European Free Trade Agreements and the Industrial Property System in Central America Fabian Böttger, 2025-06-19 This book analyses the impact of CAFTA DR and European Free Trade Agreements on the industrial property system in Central America While there is ample literature on bilateral and regional FTAs it is often limited to the contractual obligations assumed by the

participating countries This book goes a step further and analyses how these obligations are implemented through national legislation institutional changes and legal practice To provide a deeper understanding of the effects of FTAs on national IP systems the book addresses research questions that go beyond general publications on the topic Research questions include Is the combination of market access and IP rules in a bilateral FTA an effective and appropriate trade deal How are the IP requirements under the FTAs implemented into the national statutory framework Do the IP rules of FTAs sufficiently address institutional factors necessary for an effective IP system Do they provide for an appropriate balance between minimum protection and flexibilities and support relevant IP policy objectives The book covers the CAFTA DR member states Costa Rica the Dominican Republic El Salvador Guatemala Honduras and Nicaragua reviewing the implementation of FTA obligations regarding patents plant varieties test data trademarks geographical indications designs genetic resources and traditional knowledge enforcement and other areas By looking at several countries a broad range of IP rights and the practical implementation of FTA obligations this book provides a broad range of information and insights

**Protecting Intellectual Property in the Arabian Peninsula** David Price, Alhanoof AlDebasi, 2017-09-13 This work examines the endeavours of the Arabian Peninsula States namely the Gulf Cooperation Council member States of Bahrain Kuwait Oman Qatar Saudi Arabia and the UAE as well as Jordan and Yemen as prospective GCC members in establishing national intellectual property protection regimes which both meet their international treaty obligations and are also congruent with their domestic policy objectives It uses the WTO s TRIPS Agreement of 1995 as the universal benchmark against which the region s laws are assessed The challenges faced by the States in enforcing their intellectual property laws receive particular attention Protecting Intellectual Property in the Arabian Peninsula considers the changing nature of the States intellectual property laws since 1995 It argues that the decade immediately following the TRIPS Agreement was marked by a period of foreign forces shaping or influencing the character of the States intellectual property legislative regimes primarily through multilateral or bilateral trade based agreements The second and current decade however see a significant shift away from foreign influences and a move towards domestic and regional imperatives and initiatives taking over The work also examines regional initiatives for the protection of traditional knowledge and cultural heritage as areas of intellectual property which fall outside the parameters of the TRIPS Agreement but which are of significant concern to the States and other developing countries and to which they are giving increasing attention in terms of providing proper protection

Copyright, Property and the Social Contract John Gilchrist, Brian Fitzgerald, 2018-11-02 This book provides international perspectives on the law of copyright in relation to three core themes copyright and developing countries the government and copyright and technology and the future of copyright The third theme includes an examination of the extent to which technology will dictate the development of the law and a re examination of the role of copyright in fostering innovation and creativity As a critique one chapter discusses how certain rights can create or reinforce social inequality under copyright royalty systems Underlying

these themes is the role the law of copyright has in encouraging or impeding human flourishing      Cyber Espionage and International Law Russell Buchan,2018-12-27 The advent of cyberspace has led to a dramatic increase in state sponsored political and economic espionage This monograph argues that these practices represent a threat to the maintenance of international peace and security and assesses the extent to which international law regulates this conduct The traditional view among international legal scholars is that in the absence of direct and specific international law on the topic of espionage cyber espionage constitutes an extra legal activity that is unconstrained by international law This monograph challenges that assumption and reveals that there are general principles of international law as well as specialised international legal regimes that indirectly regulate cyber espionage In terms of general principles of international law this monograph explores how the rules of territorial sovereignty non intervention and the non use of force apply to cyber espionage In relation to specialised regimes this monograph investigates the role of diplomatic and consular law international human rights law and the law of the World Trade Organization in addressing cyber espionage This monograph also examines whether developments in customary international law have carved out espionage exceptions to those international legal rules that otherwise prohibit cyber espionage as well as considering whether the doctrines of self defence and necessity can be invoked to justify cyber espionage Notwithstanding the applicability of international law this monograph concludes that policymakers should nevertheless devise an international law of espionage which as *lex specialis* contains rules that are specifically designed to confront the growing threat posed by cyber espionage      Greening through Trade Sikina Jinnah,Jean-Frederic Morin,2020-03-03 How the environmental provisions in US preferential trade agreements affect both the environmental policies of trading partners and the effectiveness of multilateral environmental agreements As trade negotiations within the World Trade Organization seem permanently stalled countries turn increasingly to preferential trade agreements PTAs between smaller groups of nations Many of these PTAs incorporate environmental provisions some of which require trading partners to enact new domestic environmental laws and use the enforcement mechanisms available within trade agreements as tools for environmental protection In *Greening through Trade* Sikina Jinnah and Jean Fr d ric Morin provide the first detailed examination of how the environmental provisions in US preferential trade agreements affect both the environmental policies of trading partners and the effectiveness of multilateral environmental agreements They do so through a combination of in depth qualitative case studies and quantitative analysis of an original dataset of 688 global PTAs Jinnah and Morin explore the effects of linkages between PTAs and environmental treaties and the diffusion of environmental norms and policy through PTAs Centrally they argue that US trade agreements can serve as mechanisms both to export environmental policies to trading partner nations and third party countries and to enhance the effectiveness of multilateral environmental agreements by strengthening their enforcement capacity They caution that PTAs are not a panacea for environmental governance deeper problems of unsustainable consumption and differential power dynamics

between trading partners must be carefully navigated in deploying trade agreements for environmental protection

Amitendu Palit, 2014-06-05 The United States and 11 other countries from both sides of the Pacific are currently negotiating the Trans Pacific Partnership TPP The agreement is expected to set new benchmark for international trade through its comprehensive coverage of issues and binding regulations It is expected to eventually mature into a regional trade agreement covering the entire Asia Pacific As of now it does not include China and India the two largest emerging markets and regional economies The TPP has generated controversy for its excessive emphasis on trade issues which have remained unresolved or unaddressed at the WTO due to differences between developed and emerging markets It has also been criticized for adopting a negotiating style reflecting the US regulatory approach to international trade and also as a geo political strategy of the US for supporting its strategic rebalancing towards Asia From both economic and geo political perspectives the TPP has various significant implications for China and India that are examined in the book This book sheds light on how China and India's entries in the TPP are mutually beneficial and how both countries can gain from the TPP by gaining preferential access to large markets and using it as an opportunity for introducing more outward oriented reforms The book also cautions that US must reconcile to the rebalancing of economic power within the grouping that will occur following the entries of China and India Otherwise the TPP and China and India might walk divergent paths and trade and regional integration in Asia Pacific may not ever converge This book will interest anyone who wishes to learn more about the TPP and its future implications and challenges and China and India's roles in global and regional trade **The**

**Requirements** Gary Clyde Hufbauer ,Jeffrey J. Schott,2013-10-07 In the wake of the Great Recession of 2008 09 economists feared that protectionist policies might sweep the world economy echoing the wave of tariff escalations during the Great Depression of the 1930s To some surprise officials were more restrained and largely avoided traditional forms of protection tariffs and quotas leading some observers to underestimate the incidence of new protectionism In fact policymakers increasingly turned to more opaque behind the border nontariff barriers NTBs Using a combination of statistical analysis and case studies the authors show that local content requirements LCRs a form of NTB have become increasingly popular How much was global trade actually reduced on account of LCRs A conservative estimate might be 93 billion Case studies featured cover the healthcare sector in Brazil wind turbines in Canada the automobile industry in China solar cells and modules in India oil and gas in Nigeria and Buy American restrictions on government procurement in the United States

Congress and China Policy Robert G. Sutter,2023-11-20 Congress and China Policy Past Episodic Recent Enduring Influence supports findings that bipartisan majorities in Congress have been instrumental in driving the fundamental shift in American policy toward China carried out during the past six years Filling major gaps in the inadequate treatment of

Congress in assessments of US policy toward China this book compares recent Congressional influence with the episodes of Congressional activism in China policy over the past 200 years showing Congress recently has been more important than ever The findings also show that partisan politics Congressional executive competition for policy control swings in public and media opinion and influences by special interests longstanding drivers of past Congressional involvement in China policy have been of secondary or lesser importance as the Congressional members have grappled with the acute dangers posed by Chinese economic security and governance challenges Steady and determined efforts by this cohort of bipartisan Congressional majorities to defend America from Chinese challenges have proven more resolute than the erratic practices of President Trump and previously dismissive Joseph Biden who came late to a tougher policy This volume forecasts that US policy will remain heavily influenced by these members as they serve out their terms in the years ahead
