Identification of *Enterococcus faecalis* in a patient with urinary-tract infection based on metagenomic next-generation sequencing: a case report

Manshi Li¹, Fuhuo Yang², Yihan Lu^{1,2*} and Weifeng Huang^{1*}

Abstract

Background: Urinary tract infection (UTI) caused by various pathogenic microorganisms is ubiquitous in the parts of the urinary system such as kidney, ureter, bladder, and urethra. Currently, clinical detection of UTI is mainly focused on urine culture; however, the diagnostic value of urine culture remains limited due to the time-consuming procedure and low detection rate, especially in patients who have used antibiotics. Generally, treatment for UTI relies on empirical medication rather than pathogen diagnosis, which leads to the inappropriate use of antimicrobial agents and a significant increase in resistant strains. Comparatively, metagenomic next-generation sequencing (mNGS) is capable of overcoming the disadvantages of clinical culture, and identifying pathogens for further treatment.

Case presentation: A 33-year-old male patient was admitted to hospital with a high fever and chills. None of his autoimmune disease or thyroid function related indicators were positive, and he had no risk of endocarditis. His white blood cell count, C-reactive protein, procalcitonin, interleukin 6, and neutrophil proportion were markedly elevated. He was initially diagnosed as having an infection of unknown etiology. Since empirical treatment of Sulperazon and Metronidazole did not relieve his symptoms, both the blood and urine specimens were examined using traditional culture, serological testing, and mNGS assay. Traditional culture and serological testing produced negative results, while the mNGS assay revealed the presence of a potential pathogen, *Enterococcus faecalis*, in the urine specimen, which was further confirmed by both Sanger sequencing and qPCR analysis. A CT scan of the patient's whole abdomen showed stones in the right kidney. Once targeted antibiotic therapy was administered, the patient recovered quickly.

Conclusions: Our case illustrated that mNGS, as a novel culture-independent approach, demonstrated the capability of rapid, sensitive, and accurate pathogen identification. Furthermore, this technology provides strong support for guiding clinicians to determine appropriate treatment.

The Legal Case for Palestine Steven E. Zipperstein,2024-07-31 This book critically analyzes the Palestinian legal arguments against Israeli occupation and in favor of Palestinian statehood For the past two decades Palestinians have chosen to pursue their claims against the Israeli occupation through litigation at the international courts It is therefore appropriate the author contends to analyze the merits of the Palestinian legal claims separately from their political claims To do so the book comprises five parts Part I addresses the role of international law in the conflict as well as Palestinian legal framing and lawfare Part II recounts the relevant legal history including the crucial legal implications of the Oslo Accords Part III analyzes Palestinian legal claims regarding the West Bank and the Gaza Strip Part IV assesses the Palestinian legal case for statehood Part V analyzes Palestinian legal claims regarding Jerusalem Ultimately it is argued that the Palestinian legal case is weak even though the two state solution continues to represent the most viable long term political outcome to the conflict Moreover the author suggests that Palestinian leaders have repeatedly opted for conflict perpetuation through lawfare and violence rather than conflict resolution through negotiation Providing fresh insights into the claims and counterclaims of Palestinian legal arguments the book will appeal broadly to anyone interested in the Israeli Palestinian conflict and international law

Jurisdiction in Enclosed or Semi-Enclosed Seas Mitja Grbec, 2013-12-04 The current jurisdictional status of the Mediterranean Sea is remarkable Nearly 50 per cent of the Mediterranean waters are high seas and therefore beyond the jurisdiction of coastal States This situation means that there are no points in the Mediterranean Sea where the coasts of two States would be more than 400 nautical miles apart Such a legal situation generally prevents coastal States from adopting and enforcing their laws on the Mediterranean high seas in respect of many important fields such as the protection and preservation of the marine environment as well as the conservation of marine living resources The jurisdictional landscape of the Adriatic Sea as a sub sea and sub region of the Mediterranean is even more interesting Croatia has proclaimed an Ecological and Fisheries Protection Zone Slovenia has proclaimed a Zone of Ecological Protection while Italy has adopted a

framework law for the proclamation of its Zone of Ecological Protection without proclaiming its regime in the Adriatic It is noteworthy that if all Mediterranean and Adriatic States would proclaim an Exclusive Economic Zone EEZ there would not be a single stretch of high seas left in the entire Mediterranean Sea Both the Adriatic and Mediterranean fall in the category of enclosed or semi enclosed seas regulated by Part IX of the United Nations Convention on the Law of the Sea UNCLOS This book assesses the legal nature of Part IX of UNCLOS and discusses potential benefits of the extension of coastal State jurisdiction proclamation of EEZs and or similar sui generis zones particularly in light of the recent calls towards an integrated and holistic approach to the management of different activities in the Mediterranean Sea It examines the actual or potential extension of coastal State jurisdiction in the Adriatic Sea against the background of similar extensions elsewhere in the Mediterranean and against the background of relevant EU policies It additionally explores whether Part IX of UNCLOS imposes any duties of cooperation in relation to the extension of coastal State jurisdiction in enclosed or semi enclosed seas and puts forward practical suggestions as to how the issue of extension of coastal State jurisdiction could be approached in a way which would enhance States existing cooperation and improve the overall governance in the Mediterranean and Adriatic seas This book will be of interest to policymakers and academics and students of international law and the law of the sea
