*The X Factor* Clair T. Berube,2010-06-01 American science education is in trouble As the United States continues to lag behind other nations in science achievement the question is asked how can we better get our students excited and inspired by science This is the science teacher s duty The irony of the education profession is that some of the most important aspects of it are the hardest to measure and replicate The things that matter most can be the hardest to quantify Some teachers can know the different learning styles intelligences and brain preferences of their students They can know best practices of how to deliver instruction They can do all these things and more but still not convey imagination and passion for science to their students But some science teachers do inspire These special teachers seem to possess something the others don t but what is it Exceptional science teachers make us feel better about ourselves through their teaching of science and bring us to a higher quality of life as a result while some science teachers can be the leading researchers in their fields yet leave us flat What is

the recipe for this unique special teacher And why is it so hard to explain and describe The objective of this book is to uncover these aspects of teaching that are so hard to measure and quantify This is achieved through interviewing people who are either current or retired teachers or who were positively affected by a teacher and also through case studies of exceptional teachers in order to quantify and explain the exact traits and personality quirks of these exceptional people The contribution to the field of education this book hopes to achieve is the examination of the question why do some teachers have that X factor what exactly is it and how can we all have it **Commerce Business Daily** ,1997-12-31 *Cracking the Virginia SOL* Jeff Mandell,Princeton Review (Firm),2001-02-20 The Princeton Review realizes that acing the U S History exam is very different from getting straight As in school The Princeton Review doesn't try to teach students everything there is to know about U S history only the techniques they'll need to score higher on the exam There's a big difference In *Cracking the Virginia SOL EOC U S History* TPR will teach test takers how to think like the test makers and Remember important historical facts using TPR's Big Picture approach to studying Eliminate incorrect answer choices by using Process of Elimination and other techniques Master the most frequently tested material with TPR's U S History Hit Parade Test historical knowledge with review questions that cover each time period tested This book includes 2 full length simulated exams All of TPR's sample test questions are just like the ones test takers will see on the actual End of Course U S History exam and TPR fully explains every solution Contents Include The Mystery Exams Structure and Strategies II The U S History Review Big Picture 1 European Exploration and Colonization Big Picture2 The New Constitution Federalism and Jeffersonian Democracy Big Picture 3 Jacksonian Democracy Manifest Destiny the Civil War and Reconstruction Big Picture 4 The Gilded Age the Progressive Era and World War I 1877 1920 Big Picture 5 The Roaring Twenties the Great Depression the New Deal and World War II 1920 1945 Big Picture 6 The Cold War and the Civil Rights Movement 1945 The Near Present The History Hit Parade III The Princeton Review Practice Tests **Measuring History** S. G. Grant,2009-03-01 *Measuring History* complements the cases presented in *Wise Social Studies Practices* Yeager Davis 2005 Yeager and Davis highlight the rich and ambitious teaching that can occur in the broad context of state level testing In this book the chapter authors and I bring the particular state history tests more to the fore and examine how teachers are responding to them At the heart of *Measuring History* are cases of classroom teachers in seven states Florida Kentucky Michigan New York Texas Mississippi and Virginia where new social studies standards and new and generally high stakes state level history tests are prominent In these chapters the authors describe and analyze the state's testing efforts and how those efforts are being interpreted in the context of classroom practice The results both support and challenge prevailing views on the efficacy of testing as a vehicle for educational reform Catherine Horn University of Houston and I lay the groundwork for the case studies through a set of introductory chapters that examine the current environment the research literature and the technical qualities of history tests **Virginia Education Regulations** ,2003 Education Reform in the American States Jerry McBeath,Maria Elena

Reyes, Mary Ehrlander, 2008-04-01 Education Reform in the American States is a timely evaluation of the accountability movement in American public education culminating in the No Child Left Behind Act federal legislation of 2002 The authors treat the current accountability movement placing it in historical context and addressing the evolution in public education policymaking from the overwhelming emphasis on state and local discretion to increasing federal oversight and mandates related to federal funding They provide case studies of the educational accountability movements in nine states and analyze the factors and forces which explain progress in achievement levels as measured on standardized tests and the states prospects for meeting their NCLB targets The book and the individual case studies acknowledge the merits of NCLB while exposing several significant flaws and unintended harmful consequences of the act particularly its incentives for states to lower their standards in order to meet annual yearly progress targets and its threat to withdraw federal funds from districts with the highest percentage of disadvantaged students The audience for this study includes local state and federal education policy makers administrators and instructors in schools of education and other teaching programs educators and the general public

**Multifaceted Assessment for Early Childhood Education** Robert J.
