Lehmann,2013-03-08 From August 25 28 1978 a conference on averaged evoked potentials was held at Konstanz West
Germany Research on human evoked potentials has progressed rapidly in the past decade and a series of international
conferences have served to maintain communication between active workers in the field Among the organizations that have
a tradition of supporting such multinational communication are the North Atlantic Treaty Organization Scientific Affairs
Division the u s Office of Naval Research and the German Research Society Deutsche Forschungsgemeinschaft We have been
fortunate to have the support of all three In the early stages of planning a committee was formed composed of Professors
Rudolph Cohen Konstanz Otto Creutzfeldt Goettingen John Desmedt Brussels A M Halliday London Anthony Remond Paris
and Herbert Vaughan New York A call for papers was circulated as widely as possible and this committee carried out the
difficult task of selecting a limited number of participants from a large number of excellent abstracts At the same time
Professor Cohen of the University of Konstanz was generous enough to shoulder the task of playing host to the conference
His thoughtful arrangements contributed enormously to the comfort of the participants He and his colleagues also engineered
an ideal ambience for sharing of ideas and observations while the University of Konstanz generously provided audio
