

ASEDrive PAC

The ASEDrive PAC Sector Readers/Writers family are fully-featured smartcard proximity readers/writers, ideal for highly secured facilities as well as other facilities that wish to utilize access control, intrusion, detection or time and attendance applications.

ASEDrive PAC Contactless CPU Smartcard Reader

The ASEDrive PAC introduces patented, industry first technology encased in a anti-vandal body, thus combining smart card technology with anti-vandal protection.

General Description

Programming of the reader is done by firmware upgrade, using Athena Smart Card Programmer.

The reader scans information stored within a smartcard, sends the data to a connected access control system, and allows the integrator to set secret keys for different sectors on the card. This established a unique network with proprietary cards, where no card can possibly have the same ID on the same location and with the same reader key.

The readers meet IP65 and are suitable for both indoor and outdoor use. The interface is a 10-wire pigtail (including Wiegand, USB & RS232) that allows you to connect the unit to a control panel.

Main Features

- Advanced, secure, multi-application functionality for intelligent applications.
- Easy to deploy in the field with the configuration card (Master card) for secure sector reading of data from the sectors.
- Configurable multi output format, supports various Wiegand formats and many more.
- Multiple keypad transmission formats (optional)

- Microsoft® Windows Compatible software for Master and User Card configuration.

Advanced Features

- Dedicated LED and buzzer control inputs.
- Optical tamper sensor for case and wall tamper detection.
- Reads dedicated customer's sector or serial number.
- Internal Secure Access Module (SAM) socket (optional).
