### Abstract

Writing skill is considered a difficult skill for some of the students because of limited vocabulary as well as grammatical weaknesses. Therefore, this study aims to investigate further the practice of GT in EFL essay writing as well as its role in language learning. The study was conducted in Universitas Kristen Krida Wacana, involving eight respondents from Ukrida Department of English. Two methods were used, such as mediated-observation and interview. A writing task was given to each respondent and her/his writing process was recorded using screen-recording application. The data collected from the writing tasks were analyzed by classifying it into appropriate writing aspects while the interview data were transcribed. The result showed that students used GT in three different aspects: vocabulary, grammar, and spelling. Vocabulary became the highest used, with word-level became the first one, followed by phrase as a second highest, and sentence as the third. Spelling became the fourth highest used, while grammar was the least used among students. It is also found that GT is perceived as a dictionary as students used GT mostly in understanding vocabulary items.

### Introduction

Google Translate (GT) as one of the products provided by Google has become a popular translation tool for language students. As English is still considered as a foreign language in Indonesia, many Indonesian students, even college students appear to use GT to help them in learning English. This tool tends to help the students to get the translation quickly and easily.

From the four main skills in English, writing is considered as a difficult skill for students to acquire (Al-Badi, 2015; Al Darwish & Sadeqi, 2016; Belkhir & Benyelles, 2017; Huwari, I & Al-Khasawneh, 2013; Younes & Albalawi, 2015). The reason behind this issue is because writing skill has many components that students need to master in order to have a better writing performance, for example, subject-verb agreement, word order, and diction. Moreover, first language transfer (Belkhir & Benyelles, 2017), grammatical weakness (Huwari, I & Al-Khasawneh, 2013), the limited number of vocabulary and idioms as well as less experience with second language (Salem, 2007) are other reasons why students find writing difficult. Since writing, especially essay writing has become a problem for EFL learners (Ahmed, 2010), the existence of GT appears to play an essential role to help them while writing an essay.

English *Translation, Authorship and the Victorian Professional Woman* Lesa Scholl, 2016-02-17 In her study of Charlotte Brontë, Harriet Martineau and George Eliot Lesa Scholl shows how three Victorian women writers broadened their capacity for literary professionalism by participating in translation and other conventionally derivative activities such as editing and reviewing early in their careers. In the nineteenth century a move away from translating Greek and Latin Classical texts in favour of radical French and German philosophical works took place. As England colonised the globe Continental philosophies penetrated English shores causing fissures of faith, understanding and cultural stability. The influence of these new texts in England was unprecedented and Eliot, Brontë and Martineau were instrumental in both literally and figuratively translating these ideas for their English audience. Each was transformed by access to foreign languages and cultures first through the written word and then by travel to foreign locales and the effects of this exposure manifest in their journalism, travel writing and fiction. Ultimately Scholl argues their study of foreign languages and their translation of foreign language texts, nations and cultures enabled them to transgress the physical and ideological boundaries imposed by English middle class conventions.

Translating and Interpreting Conflict, 2007-01-01 The relationship between translation and conflict is highly relevant in today's globalised and fragmented world and this is attracting increased academic interest. This collection of essays was inspired by the first international conference to directly address the translator and interpreter's involvement in situations of military and ideological conflict and its representation in fiction. The collection adopts an interdisciplinary approach and the contributors to the volume bring to bear a variety of perspectives informed by media studies, historiography, literary scholarship and self-reflective interpreting and translation practice. The reader is presented with compelling case studies of the embeddedness of translators and interpreters either on the ground or as portrayed in fiction and of their roles in mediating, memorizing or rewriting conflict. The theoretical reflection which the essays generate regarding mediation and neutrality, ethical involvement and responsibility and the implications for translator and interpreter training will be of interest to researchers in translation, interpreting, media, intercultural and postcolonial studies.

Nature Translated Alison E. Martin, 2018-09-07 The first extensive analysis of the translation, publication and critical reception of Alexander von Humboldt's writings in nineteenth-century Britain. Prompts a rethinking of the role of translation in mediating scientific knowledge. Reconsiders how translators shape a scientist's international reputation. Draws on extensive archival material in neglected publishers' archives to shed new light on how authors, their translators and their publishers collaborate. Alexander von Humboldt was one of the most important scientists of the nineteenth century. Captivating his readers with his vibrant lyrical prose, he transformed understandings of the earth and space by rethinking nature as the interconnection of global forces. This book argues that style was key to the success of these translations and shows how Humboldt's British translators, now largely forgotten figures, were pivotal in moulding his prose and his public persona as they reconfigured his works for readers in Britain and beyond.

and punctuation among other discursive means However as the book illustrates such an endeavour goes against the grain and more precisely against a 2500 year old tradition in the case of biblical translation The inability of translators to give ear to rhythm in language results from a culturally transmitted deafness Henri Meschonnic decries the generalized unwillingness to remedy this cultural condition and discusses the political implications for the subject of discourse **Wordsworth**
