Transforming Societies after Political Violence Brandon Hamber, 2009-06-12 Paraphrasing Descartes we may say that one method is to take the reader into your confidence by explaining to him how you arrived at your discovery the other is to bully him into accepting a conclusion by parading a series of propositions which he must accept and which lead to it The first method allows the reader to re think your own thoughts in their natural order It is an autobiographical style Writing in this style you include not what you had for breakfast on the day of your discovery but any significant consideration which helped you arrive at your idea In particular you say what your aim was what problems you were trying to solve and what you hoped from a solution of them The other style suppresses all this It is didactic and intimidating J W N Watkins Confession is Good for Ideas Watkins 1963 pp 667 668 I began writing this book over 12 years ago It was started in the midst of the South African Truth and Reconciliation Commission TRC It is an exploration of what I have learned from the process During the TRC I was working at the Centre for the Study of Violence and Reconciliation CSVR in South Africa primarily with people who testified before the Commission but also on a range of research and policy initiatives in the area that is now called transitional justice I have written about the TRC process extensively

Charlie Brooker,Julie Repper,2008-01-01 In Mental Health From Policy to Practice the editors and contributors use their extensive experience and knowledge of mental health services to analyse the effectiveness of developments They reflect on how policy has developed what policy means for practice to what extent policy has been implemented and where the challenges lie Book Jacket *Anti-Semitism and Psychiatry* H. Steven Moffic,John R. Peteet,Ahmed Hankir,Mary V. Seeman,2020-02-25 Following World War II and the exposure of the concentration camps psychiatry turned its attention to a vast range of cultural concerns with results that seemed to indicate a decline of stigma over time However it is now clear that whatever drives prejudices especially in the case of anti Semitism was just dormant and perhaps not fully understood Hate crimes and anti Semitism broad recently re emerged in Europe and the United States followed shortly thereafter The US Federal Bureau of investigation reports that New York City which is still considered the most Jewish friendly region in the US experienced a 22% spike in anti Semitic hate crimes in 2018 alone with more extremes in other regions of the country Neo Nazi groups have grown stronger in the United States and abroad often resulting in organized acts of violence The recent Tree of Life synagogue shooting in Pittsburgh PA demonstrated that these acts are not limited to one on one interactions but sometimes as prolific large scale act The medical community is not immune from biases either The Cleveland Clinic recently fired a young doctor after she publicly declared her wishes to inject Jewish patients with lethal substances which is only one of many hateful comments she made on social media over the course of several years Psychiatrists in particular grapple with this as they try to serve patients of both Jewish and non Jewish descent who struggle to process these acts of hate Despite all of this there is no training and no resource to guide medical professionals through these challenges The editors of the recent Springer book Islamophobia and Psychiatry recognize this gap in the literature and seek to develop another high quality text to meet this need Written by expert clinicians in global regions where these incidents are most prevalent the book seeks to be neither political nor opinion based instead the text takes an innovative cross cultural psychiatric interaction similar to what was done with Springer s new Islamophobia book Coverage will range from foci on the social psychiatric aspects of anti Semitism to how it may in turn infuse clinical encounters between patients and clinicians Written by experts in this area the insight and expertise of psychiatrists from a variety of cultural and religious backgrounds will focus on what psychiatrists need to know to combat the negative mental health impact that increasingly rise out of this particular phenomenon Such a multi cultural psychiatric approach has never been taken before for this topic This discourse is the foundation for the primary goal of this book to develop the tools needed to improve clinical outcomes for patients Hence this book aims to present an updated comprehensive bio psychosocial perspective on anti Semitism at the interface of clinical psychiatry **Tüm Hekimler için Temel Psikiyatrik Bilgi ve Beceriler** Alişan Burak YAŞAR,2022-02-12
