Structured Discovery Cane Travel Approach to Orientation and Mobility Concepts Merry-Noel Chamberlain, 2024-01-01 *Structured Discovery Cane Travel Approach to Orientation and Mobility Concepts* is a collection of skill-building, fundamental techniques essential to develop mobility independence for students who are blind or visually impaired. This book dives into transformational mobility concepts followed by a trove of tried and true, necessary and efficient activities to enhance students' abilities to improve problem-solving skills within natural environments while using a long white cane with a metal tip as the primary mobility tool. Since *Structured Discovery Cane Travel* is individualized, this activity-based collection may be used to enhance introduction to and/or assistance with ongoing education of comprehending complicated concrete and abstract Orientation and Mobility concepts to help achieve independent mobility. *Structured Discovery Cane Travel Approach to Orientation and Mobility Concepts* focuses on encouraging students to develop intrinsic knowledge and abilities through this plethora of activity-based transformational approaches to target individual objectives. These activities logically transpire through direct exposure and/or teachable moments to hand on experiences to help students create mental mapping skills of their surroundings, which can then be utilized in novel or unfamiliar environments. Used in conjunction with *The ABCs of Structured Discovery Cane Travel for Children* by Merry Noel Chamberlain, parents and instructors of children who are blind or visually impaired will be able to comprehend and instruct O/M essentials using this vault of O/M activities.
