Demographic Trends and the Scientific and Engineering Work Force ,1985 *Recent Trends in Data Type Specification* Donald Sannella,1988 The Fifth Workshop on Specification of Abstract Data Types took place 1 4 September 1987 in Gullane near Edinburgh This book contains papers based on selected talks presented at the workshop The algebraic specification of abstract data types has been a flourishing topic in computer science since 1974 The main goal of work in this area is to evolve a methodology to support the design and formal development of reliable software The particular approach taken builds upon concepts from universal algebra and elementary category theory The core of this work has now stabilized to a great extent and is mature enough to find application in real life software engineering and to related topics such as concurrency databases and even hardware design Such applications are becoming more feasible because of the emergence of integrated specification development environments which include tools such as theorem provers based on fast term rewriting engines Researchers are also exploring ways of widening the scope of the theory to make it applicable to for example higher order functions and non deterministic programs Another trend is toward taking a more general view which allows superficially different approaches having the same general aims and methods to be unified Research in Education ,1971 *Resources in Education* ,2001-04 **Monthly Catalogue, United States Public Documents** ,1990 *Failure* Vicki E. Alger,2016-07-01 A comprehensive account and frank assessment of federal involvement in education is long overdue Education policy expert Vicki E Alger remedies this deficiency with her book Failure The Federal Miseducation of America s Children As its title indicates Failure makes no effort to sugar coat its findings Created in 1979 after a lobbying campaign that spanned generations the Department of Education has failed to live up to its promises Federal involvement whether related to testing funding or academic curricula has failed to abide by the Constitution s implication that education must remain the domain only of state and local governments and private institutions Most of all the central government s pervasive meddling in education has failed America s school children and their parents Education policy has long been mired in controversies often with opposing sides missing the mark Failure helps us step back from the skirmish du jour and redirects our focus to the big picture showing us what s gone wrong over the decades and the institutional causes of these failures It also offers a bold blueprint for returning the federal government to its constitutional role and for cultivating an educational system that meets the needs of students and parents rather than bureaucrats Concerned citizens of every stripe will benefit from Failure s history of federal education policy its brutally honest report card for the Department of Education its look at education systems across the globe and its ambitious policy recommendations Failure might even succeed in reframing the way the federal education establishment thinks about education policy *Monthly Catalog of United States Government Publications* ,1994 *ERS Bulletin* Educational Research Service (Arlington, Va.),1998 **Data for the National Education Goals Report** , Data Volume for the National Education Goals Report ,1994 **Careers in Science and Technology** Advisory Committee,Office of International Organizations and Programs and Office of Scientific

and Engineering Personnel, Office of International Affairs, Policy and Global Affairs, National Research Council, 1996-03-01

Every industrialized country is concerned with maintaining an adequate supply of individuals interested in careers in science and technology yet little is known about these efforts outside national borders This book represents the proceedings of an international conference on Trends in Science and Technology Careers held in Brussels in 1993 Organized at the behest of OSEP and the OIA Committee on International Organizations and Programs in cooperation with the European Commission DG XII and in response to a resolution of the International Council of Scientific Unions the conference identified international data on career trends assessed the research base engaged in studying science and technology careers and identified ways in which international organizations could promote greater interest in science and technology human resource development The conference laid the groundwork for continuing international discussions about the best ways to study and promote careers in science and technology and national dialogues about the ways to integrate this knowledge into human resources policies *Science Trends* ,1991-06-17
