

ARE THEY READY? PRINCIPALS' PERCEPTIONS OF THEIR PREPAREDNESS TO LEAD SCHOOL IMPROVEMENT EFFORTS

Dr. Linda Fisher-Lyons, Ed.D., University of Georgia
Linda.Fisher-Lyons@uga.edu
Director, Georgia Center for Professional Development

TOPIC: PRINCIPAL PROFESSIONAL DEVELOPMENT

PROBLEM STATEMENT

Principal leadership is correlated with student achievement, and there are significant links between specific principal behaviors and student achievement (Waters et al., 2016; Wang et al., 2018). Researchers posit that "effective leadership means more than knowing what to do—it's knowing when, how, and why to do it" (Waters et al., 2016, p. 2). However, there is limited research on the principal, as a learner, specifically principal professional development, and its impact on principal leader effectiveness (Garcia, 2014).

Researchers can identify the types of professional development experiences that are most likely to build principals' capacity to be successful leaders, negative selection trends and stagnant student achievement may be reversed.

PURPOSE OF THE STUDY

The purpose of this research is to explore the perceptions of principals regarding their preparedness to lead school improvement efforts. The research will seek to identify effective leadership practices and professional development experiences that are most likely to build principals' capacity to be successful leaders.

RESEARCH QUESTIONS

1. What are the most effective leadership practices that principals perceive to be most effective in building school improvement efforts?
2. What are the most effective professional development experiences that principals perceive to be most effective in building school improvement efforts?

POPULATION AND METHODOLOGY

The research population will include all principals in the state of Georgia who are currently serving in the role of principal. The research will use a quantitative methodology to collect data from a survey of principals regarding their perceptions of their preparedness to lead school improvement efforts.

BACKGROUND

The role of the principal is a complex one, and it is one that is constantly evolving. Principals are responsible for the overall success of the school, and they are also responsible for the professional development of their staff. This research will explore the perceptions of principals regarding their preparedness to lead school improvement efforts.

SIGNIFICANCE

The findings of this research will be significant in that they will provide information that can be used to inform the design of professional development experiences for principals. This research will also provide information that can be used to inform the design of leadership practices for principals.
