Women's Mental Health Nazilla Khanlou, F. Beryl Pilkington, 2015-07-23 This book focuses on the social and societal context of women's mental health Drawing from multidisciplinary perspectives and scholarship it pays particular attention to how women's mental health is experienced at the personal level yet it is influenced by their relationships and interacts with the larger societal context such as prevailing gender equality policies income distribution role burden peace and security Specific attention is given to the positive aspects of women's mental health such as agency resilience and how women's personal relations across diverse domains such as family work neighbourhoods are constructed and influenced by and in turn influence broader societal structures policies opportunities A unique feature of this book is that at the end of each chapter there is a Response section written by a non academic such as a community member practitioner or policy maker in which the invited authors respond to the chapter texts in the form of narrative poetry and or prose according to their various backgrounds interests and experiences

Sustainability of Southern African Ecosystems under Global Change Graham P. von Maltitz, Guy F. Midgley, Jennifer Veitch, Christian Brümmer, Reimund P. Rötter, Finn A. Viehberg, Maik Veste, 2024-01-05 This open access book about the sustainability of marine and terrestrial ecosystems in southern Africa provides a synthesis of the research program Science Partnerships for the Adaptation to Complex Earth System Processes SPACES II 2018-2022 It addresses the scientific social and economic issues related to climate change its potential impacts on the various ecosystems adaptations and management interventions for enhancing systems resilience in Southern Africa It is written by numerous scientists from African states and Germany and summarizes the latest research findings which are of great relevance for a better understanding of climate change impacts adaptations and vulnerabilities as well as for developing management options and policy options to reduce the associated risks This is crucial considering that the projected African population increase is exceptional Furthermore climate change is assumed to hit southern Africa extremely hard with a significant increase in extreme events and the frequency of severe droughts heat waves and flooding

Southern Africa hosts a high variety of ecosystems which belongs to important biodiversity hotspots for unique flora and fauna The surrounding oceans form in turn a bottle neck within the ocean s global thermohaline circulation act as a still poorly understood carbon sink and source and play an important role for fisheries as they are highly productive Considering these important aspects the book is an important interdisciplinary contribution to the scientific literature and will find a wide readership The book is aimed at students teachers and scientists in the fields of terrestrial and marine ecology environmental nature and landscape planning agriculture environmental and resource management biodiversity and nature conservation as well as scientists and representatives in specialised authorities and associations nature conservationists and policy makers of related disciplines
