Understanding Presidential Doctrines

Aiden Warren, Joseph M. Siracusa, 2022-02-14 American foreign policy has long been caught between conflicting desires to influence world affairs yet at the same time to avoid becoming entangled in the burdensome conflicts and damaging rivalries of other states Clearly in the post 1945 context the United States has failed in the attaining the latter As this new expanded edition illustrates the term doctrine seemingly re attained a charged prominence in the early twenty first century and more recently regarding the many contested debates surrounding the controversial transition to the Biden administration Notwithstanding such marked variations in the discourse presidential doctrines have crafted responses and directions conducive to an international order that best advances American interests an almost hubristic composition encompassing democratic states in the confidence that democracies do not go to war with one another open free markets on the basis that they elevate living standards engender collaboration and create prosperity self determining states on the supposition that empires were not only adversative to freedom but more likely to reject American influence and a secure global environment in which US goals can be pursued ideally unimpeded Of course with the election of Donald J Trump in 2016 the doctrinal commonalties between Republican and Democratic administrations of previous times were significantly challenged if not completely jettisoned In seeking to provide a much needed reassessment of the intersections between US foreign policy national security and doctrine Aiden Warren and Joseph M Siracusa undertake a comprehensive analysis of the defining presidential doctrines from George Washington through to the epochal post Trump Joe Biden era

Moise, 2005-07-21 The Vietnam War is anything but a forgotten war. Even today the strategies that led to an unexpected American defeat are hotly debated and much remains controversial and unclear which is not surprising given the nature of the combat in which the Vietnamese guerrilla warfare eventually won out over high tech weaponry. The task of clarifying the issues without oversimplifying this complex war that impacted the world is undertaken by *The A to Z of the Vietnam War* first in its chronology then in its introduction but mainly in a substantial dictionary section including hundreds of entries on significant persons military and political places events armed units battles and lesser engagements and weapons. And for those seeking further information an extensive bibliography is included.

Engineers at War (Hardcover) Adrian G. Traas, 2011-02-25 NOTE NO FURTHER DISCOUNT FOR THIS PRINTED PRODUCT OVERSTOCK SALE Significantly reduced list price *Engineers at War* describes the role of military engineers especially the U.S. Army Corps of Engineers in the Vietnam War. It is a story of the engineers' battle against an elusive and determined enemy in one of the harshest underdeveloped regions of the world. Despite these challenges engineer soldiers successfully carried out their combat and construction missions. The building effort in South Vietnam allowed the United States to deploy and operate a modern 500,000 man force in a far off region. Although the engineers faced huge construction tasks they were always ready to support the combat troops. They built ports and depots carved airfields and airstrips out of jungle and mountain plateaus repaired roads and bridges and constructed bases. Because of these efforts ground combat troops with their supporting engineers were able to fight the enemy from well established bases. Although most of the construction was temporary more durable facilities such as airfields port and depot complexes headquarters buildings communications facilities and an improved highway system were intended to serve as economic assets for South Vietnam. This volume covers how the engineers grew from a few advisory detachments to a force of more than 10 percent of the Army troops serving in South Vietnam. The 35th Engineer Group began arriving in large numbers in June 1965 to begin transforming Cam Ranh Bay into a major port airfield and depot complex. Within a few years the Army engineers had expanded to a command two brigades six groups twenty eight construction and combat battalions and many smaller units.
