Working Today for a Better Tomorrow in Ethiopia Emily Weedon Chapman, Margaux Vinez, 2024-03-06 Working Today for a Better Tomorrow in Ethiopia Jobs for Poor and Vulnerable Households [Handbook of Field Experiments](#) Esther Duflo, Abhijit Banerjee, 2017-03-21 Handbook of Field Experiments Volume Two explains how to conduct experimental research presents a catalog of research to date and describes which areas remain to be explored The new volume includes sections on field experiments in education in developing countries how to design social protection programs a section on how to combat poverty and updates on data relating to the impact and determinants of health levels in low income countries Separating itself from circumscribed debates of specialists this volume surpasses the many journal articles and narrowly defined books written by practitioners This ongoing series will be of particular interest to scholars working with experimental methods Users will find results from politics education and more Balances methodological insights with analyses of principal findings and suggestions for further research Appeals broadly to social scientists seeking to develop an expertise in field experiments Written in a language that is accessible to graduate students and non specialist economists *Handbook of the Economics of Education* Eric A. Hanushek, Stephen J. Machin, Ludger Woessmann, 2016-04-27 The volume of research into the economics of education has grown rapidly in recent years In this comprehensive new Handbook editors Eric Hanushek Stephen Machin and Ludger Woessmann assemble original contributions from leading researchers addressing contemporary advances in the field Each chapter illuminates major methodological and theoretical developments and directs the reader to productive new lines of research As a result these concise overviews of the existing literature offer an essential jumpstart for both students and researchers alike Demonstrates how new methodologies are yielding fresh perspectives in education economics Uses rich data to study issues of high contemporary policy relevance Explores innovations in higher education competition and the uses of technology **Economics Rules: The Rights and Wrongs of the Dismal Science** Dani Rodrik, 2015-10-13 A hugely valuable contribution In setting out a defence of the best in economics Rodrik has also provided a goal for the discipline as a whole Martin Sandbu Financial Times In the wake of the financial crisis and the Great Recession economics seems anything but a science In this sharp masterfully argued book Dani Rodrik a leading critic from within takes a close look at economics to examine when it falls short and when it works to give a surprisingly upbeat account of the discipline Drawing on the history of the field and his deep experience as a practitioner Rodrik argues that economics can be a powerful tool that improves the world but only when economists abandon universal theories and focus on getting the context right Economics Rules argues that the discipline's much derided mathematical models are its true strength Models are the tools that make economics a science Too often however economists mistake a model for the model that applies everywhere and at all times In six chapters that trace his discipline from Adam Smith to present day work on globalization Rodrik shows how diverse situations call for different models Each model tells a partial story about how the world works These stories offer

wide ranging and sometimes contradictory lessons just as children s fables offer diverse morals Whether the question concerns the rise of global inequality the consequences of free trade or the value of deficit spending Rodrik explains how using the right models can deliver valuable new insights about social reality and public policy Beyond the science economics requires the craft to apply suitable models to the context The 2008 collapse of Lehman Brothers challenged many economists deepest assumptions about free markets Rodrik reveals that economists model toolkit is much richer than these free market models With pragmatic model selection economists can develop successful antipoverty programs in Mexico growth strategies in Africa and intelligent remedies for domestic inequality At once a forceful critique and defense of the discipline Economics Rules charts a path toward a more humble but more effective science

Global Financial Development Report

2015/2016 The World Bank,2015-08-31 Global Financial Development Report 2015 2016 focuses on the ability of financial systems to sustainably extend the maturity of financial contracts for private agents The challenges of extending the maturity structure of finance are often considered to be at the core of effective sustainable financial development Sustainably extending long term finance may contribute to the objectives of higher growth and welfare shared prosperity and stability in two ways by reducing rollover risks for borrowers thereby lengthening the horizon of investments and by increasing the availability of long term financial instruments thereby allowing households to address their lifecycle challenges The aim of the report is to contribute to the global policy debate on long term finance It builds upon findings from recent and ongoing research lessons from operational work as well as on inputs from financial sector professionals and researchers both within and outside the World Bank Group Benefitting from new worldwide datasets and information on financial development it will provide a broad and balanced review of the evidence and distill pragmatic lessons on long term finance and related policies This report the third in the Global Financial Development Report series follows the second issue on Financial Inclusion and the inaugural issue Rethinking the Role of the State in Finance The Global Financial Development Report 2015 2016 will be accompanied by a website worldbank.org/financialdevelopment containing extensive datasets research papers and other background materials as well as interactive features

Randomized Control Trials in the Field of Development Florent

Bédécarrats,Isabelle Guérin,François Roubaud,2020-09-17 In October 2019 Abhijit Banerjee Esther Duflo and Michael Kremer jointly won the 51st Sveriges Riksbank Prize in Economic Sciences in Memory of Alfred Nobel for their experimental approach to alleviating global poverty But what is the exact scope of their experimental method known as randomized control trials RCTs Which sorts of questions are RCTs able to address and which do they fail to answer The first of its kind Randomized Control Trials in the Field of Development A Critical Perspective provides answers to these questions explaining how RCTs work what they can achieve why they sometimes fail how they can be improved and why other methods are both useful and necessary Bringing together leading specialists in the field from a range of backgrounds and disciplines economics econometrics mathematics statistics political economy socioeconomics anthropology philosophy global health

epidemiology and medicine it presents a full and coherent picture of the main strengths and weaknesses of RCTs in the field of development Looking beyond the epistemological political and ethical differences underlying many of the disagreements surrounding RCTs it explores the implementation of RCTs on the ground outside of their ideal theoretical conditions and reveals some unsuspected uses and effects their disruptive potential but also their political uses The contributions uncover the implicit worldview that many RCTs draw on and disseminate and probe the gap between the method's narrow scope and its success while also proposing improvements and alternatives Without disputing the contribution of RCTs to scientific knowledge Randomized Control Trials in the Field of Development warns against the potential dangers of their excessive use arguing that the best use for RCTs is not necessarily that which immediately springs to mind Written in plain language this book offers experts and laypeople alike a unique opportunity to come to an informed and reasoned judgement on RCTs and what they can bring to development

Behavioral Science & Policy: Volume 2, Issue 2 Craig Fox, Sim B.

Sitkin, 2017-06-27 The success of nearly all public and private sector policies hinges on the behavior of individuals groups and organizations Today such behaviors are better understood than ever thanks to a growing body of practical behavioral science research However policymakers often are unaware of behavioral science findings that may help them craft and execute more effective and efficient policies The pages of this new journal will become a meeting ground a place where scientists and non scientists can encounter clearly described behavioral research that can be put into action By design the scope of BSP is broad with topics spanning health care financial decisionmaking energy and the environment education and culture justice and ethics and work place practices Contributions will be made by researchers with expertise in psychology sociology law behavioral economics organization science decision science and marketing The journal is a key offering of the Behavioral Science Policy Association in partnership with the Brookings Institution The mission of BSPA is to foster dialog between social scientists policymakers and other practitioners in order to promote the application of rigorous empirical behavioral science in ways that serve the public interest BSPA does not advance a particular agenda or political perspective

Shadow Networks Francisco Louçã, Michael Ash, 2018-10-03 The 2007-08 financial crisis surprised many economists and the public But how did the crisis come about why was it so deep and why has the clean up been so slow and painful Many accounts of the crisis focus on renegade activity in marginal financial sectors Shadow Networks challenges this pervading view and sets out to demonstrate that far from a dissident branch the shadow finance that initiated the crisis is tightly networked with and highly profitable for bank based finance The collapse was not an accident but baked into the system of finance from the start Shadow Networks traces the complex web of power that caused crisis and gives vivid descriptions of the actors in the quarter century leading up to 2007 to explain how the now decade long crisis took shape Shadow Networks Financial Disorder and the System that Caused Crisis is a probing examination of the roles of the powerful elite It traces the networks and institutions that support a finance focused market centered model of economy and society from their

ascendancy to their surprising resilience in the face of manifest failures Handbook of Mixed Methods Research in Business and Management Roslyn Cameron,Xanthe Golenko,2023-10-06 This timely Handbook illustrates a myriad of theoretical and practical applications in the utility of mixed methods research MMR in business and management It surveys innovations in MMR to provide a full overview of the past current and future complexities of the field This title contains one or more Open Access chapters Handbook of Quantitative Research Methods in Entrepreneurship George Saridakis,Marc Cowling,2020-06-26 This Handbook will be an invaluable original reference tool for both researchers and students embarking on a new research project It will be useful both for those who are using quantitative data for the first time and for more experienced researchers who are interested in new quantitative techniques and methods Experimental Conversations Timothy N. Ogden,2024-03-19 Discussions of the use and limits of randomized control trials considering the power of theory external validity gaps in knowledge and what issues matter The practice of development economics has undergone something of a revolution as many economists have adopted new methods to answer perennial questions about the effectiveness of anti poverty programs In this book prominent development economists discuss the use and impact of one of the most significant of these new methods randomized control trials RCTs and field experiments In extended interviews conducted over a period of several years they explain their work and their thinking and consider the broader issues of how we learn about the world and how we can change it for the better These conversations offer specialists and nonspecialists alike a unique opportunity to hear economists speak in their own words free of the confines of a particular study or econometric esoterica The economists describe how they apply research findings in the way they think about the world revealing their ideas about the power of theory external validity gaps in knowledge and what issues matter Also included are interviews with RCT observers critics sponsors consumers and others Each interview provides a brief biography of the interviewee Thorough annotations offer background and explanations for key ideas and studies referred to in the conversations Contributors Abhijit Banerjee Nancy Birdsall Chris Blattman Alex Counts Tyler Cowen Angus Deaton Frank DeGiovanni Esther Duflo Pascaline Dupas Xavi Gine Rachel Glennerster Judy Gueron Elie Hassenfeld Dean Karlan Michael Kremer David McKenzie Jonathan Morduch Lant Pritchett Jonathan Robinson Antoinette Schoar Dean Yang Latin American Economic Outlook 2017 Youth, Skills and Entrepreneurship OECD,CAF Development Bank of Latin America,Economic Commission for Latin America and the Caribbean,2016-10-29 The 2017 edition of the Latin American Economic Outlook explores youth skills and entrepreneurship Young Latin Americans embody the region s promise and perils They stand at the crossroads of a region whose once promising economy and social progress is now undergoing a slowdown *Prioritizing Development* Bjorn Lomborg,2018-06-07 This book is a unique guide to making the world a better place Experts apply a critical eye to the United Nations Sustainable Development agenda also known as the Global Goals which will affect the flow of 2 5 trillion of development aid up until 2030 Renowned economists led by Bjorn Lomborg determine what

pursuing different targets will cost and achieve in social environmental and economic benefits There are 169 targets covering every area of international development from health to education sanitation to conflict Together these analyses make the case for prioritizing the most effective development investments A panel of Nobel Laureate economists identify a set of 19 phenomenal development targets and argue that this would achieve as much as quadrupling the global aid budget

Handbook of International Development and Education Pauline Dixon, Steve Humble, Chris Counihan, 2015-06-29 This Handbook considers the myths and untruths that currently exist in international development and education Using historic and contemporary evidence this compendium redefines the international development narrative through a new understanding of Doing Business 2016 World Bank, 2015-10-27 Doing Business 2016 is the 13th publication in a series of annual reports comparing business regulation in 189 economies This year the publication addresses regulations affecting 10 areas of everyday business activity including Starting a business Dealing with construction permits Getting electricity Registering property Getting credit Protecting minority investors Paying taxes Trading across borders Enforcing contracts Resolving insolvency Doing Business 2016 updates all indicators as of June 1 2015 ranks economies on their overall ease of doing business and analyzes reforms to business regulation identifying which economies are strengthening their business environment the most This report illustrates how reforms in business regulations are being used to analyze economic outcomes for domestic entrepreneurs and for the wider economy It is a flagship product produced by the World Bank Group that garners worldwide attention on regulatory barriers to entrepreneurship More than 60 economies have used the Doing Business indicators to shape reform agendas and monitor improvements on the ground In addition the Doing Business data has generated over 2 100 articles in peer reviewed academic journals since its inception Stop the Violence in Latin America Laura Chioda, 2017-06-19 The Latin America and Caribbean LAC region has the undesirable distinction of being the world's most violent region with 24.7 homicides per 100 000 inhabitants The magnitude of the problem is staggering and persistent Of the top 50 most violent cities in the world 42 are in LAC In 2010 alone 142 302 people in LAC fell victim to homicide representing 390 homicides per day and 4.06 homicides every 15 minutes Crime disproportionately affects young men aged 20 to 24 whose homicide rate of 92 per 100 000 nearly quadruples that of the region The focus of Crime Prevention in Latin America and the Caribbean is to identify policy interventions that whether by design or indirect effect have been shown to affect antisocial behavior early in life and patterns of criminal offending in youth and adults Particular attention is devoted to recent studies that rigorously establish a causal link between the interventions in question and outcomes This publication adopts a lifecycle perspective and argues that as individuals progress through different stages of the lifecycle not only do different sets of risk factors arise and take more prominence but their interactions and interdependencies shape human behavior These interactions and the relative importance of different sets of risk factors identify relevant margins that can effectively be targeted by prevention policies not only early in life but throughout the

lifecycle Indeed prevention can never start too early nor start too late nor be too comprehensive

Private Power, Online Information Flows and EU Law Angela Daly, 2016-12-01 This monograph examines how European Union law and regulation address concentrations of private economic power which impede free information flows on the Internet to the detriment of Internet users autonomy In particular competition law sector specific regulation if it exists data protection and human rights law are considered and assessed to the extent they can tackle such concentrations of power for the benefit of users Using a series of illustrative case studies of Internet provision search mobile devices and app stores and the cloud the work demonstrates the gaps that currently exist in EU law and regulation It is argued that these gaps exist due in part to current overarching trends guiding the regulation of economic power namely neoliberalism by which only the situation of market failure can invite ex ante rules buoyed by the lobbying of regulators and legislators by those in possession of such economic power to achieve outcomes which favour their businesses Given this systemic and extra legal nature of the reasons as to why the gaps exist solutions from outside the system are proposed at the end of each case study This study will appeal to EU competition lawyers and media lawyers

Diversities of Innovation Ulrich Hilpert, 2019-04-02 Innovation is often understood exclusively in terms of the economy but it is definitely a result of human labour and ingenuity and of the relationships among individuals and social groups Some societies and governmental structures are clearly more successful than others they act in divergent ways fostering innovation and employment and they utilize varied opportunities from different fields of research from new products and from their educational systems Thus innovation varies fundamentally between countries and public policies in matters such as energy technology environmental technologies facing climate change and advancing conditions of life can be determined according to different societies needs This volume brings together a range of world experts to compare countries and continents and help develop a fuller picture of innovations and their social basis It will be of interest to researchers in regional studies and economics as well as labour unions practitioners and policy makers

More Human Steve Hilton, Scott Bade, Jason Bade, 2016-04-26 People feel angry and let down by their leaders as well as by the institutions that dominate their lives political parties government bureaucracy and corporations Yet the cause of this malaise according to political advisor turned tech CEO Steve Hilton is not being addressed by politicians on the left or the right Hilton argues that much of our daily experience from the food we eat to the governments we elect to the economy on which our wealth depends to the way we care for our health and well being has become too big too bureaucratic and too distant from the human scale More Human sets out a radical manifesto for change aimed at the root causes of our problems rather than just the symptoms Whether it s using the latest advances in neuroscience to inform the fight against poverty and inequality or applying lessons from America s most radical schools to transform our children s education this book is an agenda for rethinking and redesigning the outdated systems and structures of our politics government economy and society to make them more suited to the way we want to live our lives today To make them more human

The Routledge

Handbook of Financial Literacy Gianni Nicolini, Brenda J. Cude, 2021-12-30 Financial literacy and financial education are not new topics even though interest in these topics among policymakers financial authorities and academics continues to grow The Routledge Handbook of Financial Literacy provides a comprehensive reference work that addresses both research perspectives and practical applications to financial education This is the first volume to summarize the milestones of research in financial literacy from multiple perspectives to offer an overview The book is organized into six parts The first three parts provide a conceptual framework which discusses what financial literacy is how it should be measured and explains why it represents a relevant topic and effective tool in enhancing decision making among consumers as well as consumer protection strategies Part IV addresses the connection between financial education and financial literacy with chapters about financial education in school settings as well as for adults This part includes an analysis of the role of Fintech and the use of gamification in financial education Part V is a collection of contributions that analyze financial literacy and financial education around the world with a focus on geographical areas including the U S South America Western Europe Eastern Europe Asia and Africa This part also considers how financial literacy should be addressed in the case of Islamic finance The concluding part of the book examines how financial literacy is related to other possible approaches to consumer finance and consumer protection addressing the relationships between financial literacy and behavioral economics financial well being and financial inclusion This volume is an indispensable reference for scholars who are new to the topic including undergraduate and graduate students and for experienced researchers who wish to enrich their knowledge policymakers seeking a broader understanding and an international perspective and practitioners who seek knowledge of best practices as well as innovative approaches
