**The Geography of Injustice** Barak Kushner, 2024-03-15 In *The Geography of Injustice* Barak Kushner argues that the war crimes tribunals in East Asia formed and cemented national divides that persist into the present day In 1946 the Allies convened the Tokyo Trial to prosecute Japanese wartime atrocities and Japan's empire At its conclusion one of the judges voiced dissent claiming that the justice found at Tokyo was only the sham employment of a legal process for the satisfaction of a thirst for revenge War crimes tribunals Kushner shows allow for the history of the defeated to be heard In contemporary East Asia a fierce battle between memory and history has consolidated political camps across this debate The Tokyo Trial courtroom as well as the thousands of other war crimes tribunals opened in about fifty venues across Asia were legal stages where prosecution and defense curated facts and evidence to craft their story about World War Two These narratives and counter narratives form the basis of postwar memory concerning Japan's imperial aims across the region The archival record and the interpretation of court testimony together shape a competing set of histories for public consumption *The Geography of Injustice* offers compelling evidence that despite the passage of seven decades since the end of the war East Asia is more divided than united by history

**The Great Music City** Andrea Baker, 2019-03-01 In the 1960s as gentrification took hold of New York City Jane Jacobs predicted that the city would become the true player in the global system Indeed in the 21st century more meaningful comparisons can be made between cities than between nations and states Based on case studies of Melbourne Austin and Berlin this book is the first in depth study to combine academic and industry analysis of the music cities phenomenon Using four distinctly defined algorithms as benchmarks it interrogates Richard Florida's creative cities thesis and applies a much needed synergy of urban sociology and musicology to the concept mediated by a journalism lens Building on seminal work by Robert Park Lewis Mumford and Jane Jacobs it argues that journalists are the cultural branders and street theorists whose ethnographic approach offers critical insights into the urban sociability of music activity

**Economics Rules: The Rights and Wrongs of the Dismal Science** Dani Rodrik, 2015-10-13 A hugely valuable contribution In setting out a defence of the best in economics Rodrik has also provided a goal for the discipline as a whole Martin Sandbu Financial Times In the wake of the financial crisis and the Great Recession economics seems anything but a science In this sharp masterfully argued book Dani Rodrik a leading critic from within takes a close look at economics to examine when it falls short and when it works to give a surprisingly upbeat account of the discipline Drawing on the history of the field and his deep experience as a practitioner Rodrik argues that economics can be a powerful tool that improves the world but only when economists abandon universal theories and focus on getting the context right *Economics Rules* argues that the discipline's much derided mathematical models are its true strength Models are the tools that make economics a science Too often however economists mistake a model for the model that applies everywhere and at all times In six chapters that trace his discipline from Adam Smith to present day work on globalization Rodrik shows how diverse situations call for

different models Each model tells a partial story about how the world works These stories offer wide ranging and sometimes contradictory lessons just as children s fables offer diverse morals Whether the question concerns the rise of global inequality the consequences of free trade or the value of deficit spending Rodrik explains how using the right models can deliver valuable new insights about social reality and public policy Beyond the science economics requires the craft to apply suitable models to the context The 2008 collapse of Lehman Brothers challenged many economists deepest assumptions about free markets Rodrik reveals that economists model toolkit is much richer than these free market models With pragmatic model selection economists can develop successful antipoverty programs in Mexico growth strategies in Africa and intelligent remedies for domestic inequality At once a forceful critique and defense of the discipline Economics Rules charts a path toward a more humble but more effective science

**The Experiment Must Continue** Melissa Graboyes,2015-11-09 The Experiment Must Continue is a beautifully articulated ethnographic history of medical experimentation in East Africa from 1940 through 2014 In it Melissa Graboyes combines her training in public health and in history to treat her subject with the dual sensitivities of a medical ethicist and a fine historian She breathes life into the fascinating histories of research on human subjects elucidating the hopes of the interventionists and the experiences of the putative beneficiaries Historical case studies highlight failed attempts to eliminate tropical diseases while modern examples delve into ongoing malaria and HIV AIDS research Collectively these show how East Africans have perceived research differently than researchers do and that the active participation of subjects led to the creation of a hybrid ethical form By writing an ethnography of the past and a history of the present Graboyes casts medical experimentation in a new light and makes the resounding case that we must readjust our dominant ideas of consent participation and exploitation With global implications this lively book is as relevant for scholars as it is for anyone invested in the place of medicine in society

**Really Good Schools** James Tooley,2021-04-12 Almost overnight a virus has brought into question America s nearly 200 year old government run K 12 school system and prompted an urgent search for alternatives But where should we turn to find them Enter James Tooley s Really Good Schools A distinguished scholar of education and the world s foremost expert on private low cost innovative education Tooley takes readers to some of the world s most impoverished communities located in some of the world s most dangerous places including India and such war torn countries as Sierra Leone Liberia and South Sudan There in places where education experts fear to tread Tooley finds thriving private schools that government multinational NGOs and even international charity officials deny exist Why Because the very existence of low cost high quality private schools shatters the prevailing myth in the U S U K and western Europe that absent government affordable high quality schools for the poor could not exist But they do And they are ubiquitous and in high demand Founded by unheralded local educational entrepreneurs these schools are proving that self organized education is not just possible but flourishing often enrolling far more students than free government schools do at prices within reach of even the most impoverished families In the course of his analysis Tooley asks the key questions What proportion of poor children is served How good are the private schools What are the business models for these schools And can they be replicated and improved The evidence is in In poor urban and rural areas around the world children in low cost private schools outperform those in government schools And the schools do so for a fraction of the per pupil cost Ubiquity affordability quality value for money

equity choice and sustainability these are the seven categories by which schooling should be judged according to Tooley In every instance one is forced to conclude that low cost non governmental entrepreneurial education as practiced by the poor around the globe contains the key to their rise to prosperity and leadership positions within their own respective cultures Alarmed by recent government barriers in education Americans can now find hope in the triumph in the face of acute adversity of these remarkable schools Because of the pandemic parents in America and Europe are discovering that the education of their children is indeed possible and likely far better without government meddling with rigid seat time mandates outdated school calendars absurd age driven grade levels and worse testing regimes And having experienced the first fruits of educational freedom parents will be increasingly open to the possibilities of ever greater educational entrepreneurship and innovation Thankfully they have Really Good Schools to show the way *Methods for Capacity Allocation in Deregulated Railway Markets* Abderrahman Ait Ali, 2020-10-01 Faced with increasing challenges railways around Europe have recently undergone major reforms aiming to improve the efficiency and competitiveness of the railway sector New market structures such as vertical separation deregulation and open access can allow for reduced public expenditures increased market competition and more efficient railway systems However these structures have introduced new challenges for managing infrastructure and operations Railway capacity allocation previously internally performed within monopolistic national companies are now conferred to an infrastructure manager The manager is responsible for transparent and efficient allocation of available capacity to the different often competing licensed railway undertakings This thesis aims at developing a number of methods that can help allocate capacity in a deregulated vertically separated railway market It focuses on efficiency in terms of social welfare and transparency in terms of clarity and fairness The work is concerned with successive allocation of capacity for publicly controlled and commercial traffic within a segmented railway market The contributions include cost benefit analysis methods that allow public transport authorities to assess the social welfare of their traffic and create efficient schedules The thesis also describes a market based transparent capacity allocation where infrastructure managers price commercial train paths to solve capacity conflicts with publicly controlled traffic Additionally solution methods are developed to help estimate passenger demand which is a necessary input both for resolving conflicts and for creating efficient timetables Future capacity allocation in deregulated markets may include solution methods from this thesis However further experimentations are still required to address concerns such as data legislation and acceptability Moreover future works can include prototyping and pilot projects on the proposed solutions and investigating legal and digitalisation strategies to facilitate the implementation of such solutions Med kande utmaningar har j rnv gar runt om i Europa genom tt stora reformer som syftar till att f rb ttra j rnv gssektorns effektivitet och konkurrenskraft Nya marknadsstrukturer s som vertikal separering avreglering och ppet tilltr de f r flera operat rer kan m jligg ra minskade offentliga kostnader kad marknadskonkurrens och effektivare j rnv gssystem Denna omreglering av j rnv
