Medeiros,Roger Cliff,Keith Crane,James C. Mulvenon,2005-12-19 Since the early 1980s a prominent and consistent conclusion drawn from research on China s defense industrial complex has been that China s defense production capabilities are rife with weaknesses and limitations This study argues for an alternative approach From the vantage point of 2005 it is time to shift the focus of current research to the gradual improvements in and the future potential of China s defense industrial complex The study found that China s defense sectors are designing and producing a wide range of increasingly advanced weapons that in the short term are relevant to a possible conflict over Taiwan but also to China s long term military presence in Asia Part of a larger RAND Project AIR FORCE study on Chinese military modernization this study examines the current and future capabilities of China s defense industry The goals of this study are to 1 **Asian Shipping** ,2000 **Fundamentals of RCS Prediction Methodology using Parallelized Numerical Electromagnetics Code (NEC) and Finite Element Pre-processor** Vineetha Joy,G. Being sets out to rethink what it meant to be poor in a world where this was understood as the need to work for a living exploring the discourses that constructed poverty as something to fear and linking them with experiences of penia among different social groups in Athens Drawing on current research into and debates around poverty within the social sciences it provides a critical reassessment of poverty in democratic Athens and argues that it need not necessarily be seen in terms of these elitist ideological categories nor indeed solely as an economic condition the state of having no wealth but that it should also be understood in terms of social relations capabilities and well being In developing a framework to analyse the complexities of poverty so conceived and exploring the discourses that shaped it the volume reframes poverty as being dynamic and multidimensional and provides a valuable insight into what the poor in Athens men and women citizen and non citizen slave and free were able to do or to be *Aeronautical Engineering* ,1983 A selection of annotated references to unclassified reports and journal articles that were introduced into the NASA scientific and technical information system and announced in Scientific and technical aerospace reports STAR and International aerospace abstracts IAA *NASA SP.* ,1962
