Personal Narratives of Black Educational Leaders Robert T. Palmer, Mykia O. Cadet, Kofi LeNiles, Joycelyn L. Hughes, 2019-02-18. Challenging misconceptions related to Black academic achievement, this volume provides original perspectives on the policies, initiatives, and factors that facilitate the success of students of color as they progress along the educational pipeline. Grounded in an anti-deficit framework, this book offers personal narratives of Black educational leaders and professionals who discuss aspects of their educational experiences and pathways to success. With takeaways for research and practice, the individual narratives that comprise this book add to the conversation and advance important lessons gained from personal stories about achieving success for Blacks and other minority students. Exploring the Biological Contributions to Human Health Institute of Medicine, Board on Health Sciences Policy, Committee on Understanding the Biology of Sex and Gender Differences, 2001-07-02. It's obvious why only men develop prostate cancer and why only women get ovarian cancer. But it is not obvious why women are more likely to recover language ability after a stroke than men or why women are more apt to develop autoimmune diseases such as lupus. Sex differences in health throughout the lifespan have been documented. Exploring the Biological Contributions to Human Health begins to snap the pieces of the puzzle into place so that this knowledge can be used to improve health for both sexes. From behavior and cognition to metabolism and response to chemicals and infectious organisms, this book explores the health impact of sex being male or female according to reproductive organs and chromosomes and gender one's sense of self as male or female in society. Exploring the Biological Contributions to Human Health discusses basic biochemical differences in the cells of males and females and health variability between the sexes from conception throughout life. The book identifies key research needs and opportunities and addresses barriers to research. Exploring the Biological Contributions to Human Health will be important to health policy.
