ECIR is the annual conference of the British Computer Society's specialist group in Information Retrieval. This year the conference was held at the School of Computing and Technology at the University of Sunderland. ECIR began life as the annual Colloquium on Information Retrieval Research. The colloquium was held in the UK each year until 1998 when the event was held in Grenoble, France. Since then the conference venue has alternated between the United Kingdom and Continental Europe and the event was renamed the European Conference on Information Retrieval. In recent years ECIR has continued to grow and has become the major European forum for the discussion of research in the field of Information Retrieval. To mark this metamorphosis from a small informal colloquium to a major event in the IR research calendar the BCS IRSG decided to rename the event to the European Conference on Information Retrieval. ECIR 2004 received 88 full paper submissions from across Europe and further afield including North America, China, and Australia, a testament to the growing popularity and reputation of the conference. Out of the 88 submitted papers, 28 were accepted for presentation. All papers were reviewed by at least three reviewers. Among the accepted papers, 11 have a student as the primary author, illustrating that the traditional student focus of the original colloquium is alive today.
