The phenomenal growth of Islamic finance in the last few decades has been accompanied by a host of interesting questions and challenges One of the critical challenges is how Islamic financial institutions can be motivated to participate in the equity like profit and loss sharing PLS contracts It is observed that Islamic banks are reluctant to participate in the pure PLS scheme which is manifested by the rising concentration of investment on murabaha or mark up financing This phenomenon has been the hotbed of academic criticism on the contemporary practice of Islamic banking This book explains the murabaha syndrome in light of the incentive provided by the current institutional framework and what are the changes required in the governance structure to mend this anomaly **Pakistan & Gulf Economist**, 2009 **Glaciers of the Karakoram Himalaya** Kenneth Hewitt, 2013-09-12 The Karakoram contains the greatest concentration of glaciers and most of the largest ice masses outside high latitudes They comprise major stores and sources of fresh water in an otherwise extreme continental dry region As many as 200 million people living downstream in the valleys of the Indus and Yarkand Rivers depend on melt waters from snow and ice They are at risk from climate change impacts on glaciers and water supply and from hazards such as glacial lake outburst floods Useful research initiatives go back to the nineteenth century but coverage has generally been limited geographically and has not been continuous over time It is almost 80 years since a monograph was devoted to the Karakoram glaciers The book presents a comprehensive overview including statistics for the ice cover glacier mass balance and dynamics glacierized landscapes rock glaciers water resources and environmental hazards Published glaciological and related research is surveyed along with expedition reports and archival materials in several languages The expanding potential of satellite coverage is exploited but conditions and processes reported from field investigations are the main focus Previously unpublished observations by the author are presented based on some 45 years of work in the region Broad understanding of the glacial environment is used to address emerging concerns about the High Asian cryosphere and the fate of its glaciers These are discussed in relation to the pressing issues of water supply environmental risk and sustainability Questions of what is not known help identify much needed monitoring and research The book is of interest to researchers professionals and those studying glaciers mountain environments water resources and environmental hazards The topics discussed should be of concern for anyone involved in regional development and global change in South and Inner Asia Power, Property Rights, and Economic Development Mohammad Dulal Miah, Yasushi
