Herbert, 2014-01-24 Videoland offers a comprehensive view of the tangible phase of consumer video when Americans largely accessed movies as material commodities at video rental stores. Video stores served as a vital locus of movie culture from the early 1980s until the early 2000s, changing the way Americans socialized around movies and collectively made movies meaningful. When films became tangible as magnetic tapes and plastic discs, movie culture flowed out from the theater and the living room entered the public retail space and became conflated with shopping and salesmanship. In this process, video stores served as a crucial embodiment of movie culture's historical move toward increased flexibility, adaptability, and customization. In addition to charting the historical rise and fall of the rental industry, Herbert explores the architectural design of video stores, the social dynamics of retail encounters, the video distribution industry, the proliferation of video recommendation guides, and the often surprising persistence of the video store as an adaptable social space of consumer culture. Drawing on ethnographic fieldwork, cultural geography, and archival research, Videoland provides a wide-ranging exploration of the pivotal role video stores played in the history of motion pictures and is a must-read for students and scholars of media history. Sterritt, 2017-12-18 Rock n Roll Movies presents an eclectic look at the many manifestations of rock in motion pictures, from teen-oriented B movies to Hollywood blockbusters to avant-garde meditations to reverent biopics to animated shorts to performance documentaries. Acclaimed film critic David Sterritt considers the diverse ways that filmmakers have regarded rock n roll, some cynically cashing in on its popularity and others responding to the music as sincere fans, some depicting rock as harmless fun and others representing it as an open challenge to mainstream norms. **Transaction Man** Nicholas

Lemann, 2019-09-10 An Amazon Best History Book of 2019 A splendid and beautifully written illustration of the tremendous importance public policy has for the daily lives of ordinary people. Ryan Cooper, Washington Monthly. Over the last generation, the United States has undergone seismic changes. Stable institutions have given way to frictionless transactions, which are celebrated no matter what collateral damage they generate. The concentration of great wealth has coincided with the fraying of social ties and the rise of inequality. How did all this come about? In Transaction Man, Nicholas Lemann explains the United States and the world's great transformation by examining three remarkable individuals who epitomized and helped create

their eras Adolf Berle Franklin Delano Roosevelt's chief theorist of the economy imagined a society dominated by large corporations which a newly powerful federal government had forced to become benign and stable institutions contributing to the public good by offering stable employment and generous pensions By the 1970s the corporations large stockholders grew restive under this regime and their chief theoretician Harvard Business School's Michael Jensen insisted that firms should maximize shareholder value whatever the consequences Today Silicon Valley titans such as the LinkedIn cofounder and venture capitalist Reid Hoffman hope networks can reknit our social fabric Lemann interweaves these fresh and vivid profiles with a history of the Morgan Stanley investment bank from the 1930s through the financial crisis of 2008 while also tracking the rise and fall of a working class Chicago neighborhood and the family run car dealerships at its heart Incisive and sweeping *Transaction Man* is the definitive account of the reengineering of America and the enormous impact it has had on us all
