**Strategy and Organization of Corporate Banking** Giacomo de Laurentis, 2005-09-12 Reinhard H Schmidt The impressive development of the finance literature with its emphasis on asset pricing and the formal modeling of incentive systems during the past three decades has largely relegated the business and operational aspects of banking as an industry from the agenda of academic research Though this is understandable it is especially regrettable in view of the dynamic developments in the banking industry which have started about a decade ago and are currently in full swing Fortunately there are now signs of a change to the effect that banking is back on the research agenda The present book by Professor De Laurentis and his co authors is a highly innovative and interesting manifestation of this reorientation Banking is an important part of any financial system and it is especially important in the financial systems of the countries of Continental Europe such as Italy France and Germany which have been bank based for decades and which are in my view likely to remain bank based for the foreseeable future There are many reasons based on empirical and theoretical considerations to believe that strong banks are not only important for the banking industry itself but also for the respective national economies

This book outlines the influences on the evolution of international banking and analyses trade and investment in the international banking industry covering cross border trade in banking services, foreign direct investment by banks, international financial centres, capital movements and competition between banks. Focusing on competitive advantage, it compares the leading banks in international business. This book is of interest to academics and students as well as to bankers. It provides a transversal and truly comprehensive overview of the international banking industry focusing on the organization of the industry and the influences on it rather than on the functions of banks themselves.

### **Strategic Changes for Business**

**Models in the German Retail Banking Industry in the Post Financial Crisis Era** Tobias Pommerening, 2010-10

Bachelor Thesis from the year 2010 in the subject Business economics General grade 2.0. Baden-Wuerttemberg Cooperative State University DHBW. Language: English. Abstract: The Great Recession as the global financial meltdown has come to be called has had devastating effects on the global economic landscape, particularly on the banking industry. While the big multinational investment banks that were at the heart of this crisis were hit most severely, with players such as Lehman Brothers Inc. among others disappearing from the financial landscape, retail banks, institutions primarily engaged in the standard banking business with private customers, also suffered considerably from the global collapse of financial markets. Unlike their multinational counterparts, however, retail banks cannot rely on profitable mergers and acquisition activities or proprietary trading to boost income once the economy picks up again. While the challenges created by the Great Recession for retail banks are complex, they are not the only threat to long-run profitability. In many markets, especially in the mature western European ones, other dark clouds appear on the horizon. To name only a few: plummeting sales, narrowing profit margins, consumers' lack of confidence in the banking system, and operational cost problems threaten retail banks in mature markets such as Germany. Postbank, a major German retail bank with a strong domestic customer base, is one of the players that have to make strategic adjustments to cope with a changing economic landscape. But what will these strategic adjustments be, and in which priority do they need to be undertaken? Although literature on the financial crisis and expected changes in banking industry is paramount, so far little attention has been given to showing how strategy in the retail banking segment in the distinct geographic location of Germany will have to look like for a specific player in the post-financial crisis era.
