Firms' Location Selections and Regional Policy in the Global Economy Toshiharu Ishikawa, 2015-06-03 This book offers a new understanding of how firms determine their location and what kinds of regional economic policies are needed to attract factories to a country and a region in a highly globalized economic setting The theoretical and empirical analyses examine the influence of the transfer pricing system corporate tax rates and a country s industrial structure on a firm s decision to locate and the impact of firms location on regional economic activities The theoretical analysis elucidates the

importance of the above mentioned factors in the firm's selection of possible location. The empirical analysis uses as an example the case of a supply chain in East Asia. The empirical analysis is illustrated with the regional spatial development experiences at the country level and city level of selected countries and cities. The analysis offers a perspective for understanding the spatial patterns of a cross border production system.

International Taxation of Manufacturing and Distribution John Abrahamson, 2016-02-18. The most thorough treatment of its subject available. This book introduces and analyses the international tax issues relating to international manufacturing and distribution activities extending from the tax regime in the country where the manufacturing activities are located through to regional purchase and sales companies to the taxation of local country sales companies. The analysis includes the domestic tax laws relating to manufacturing and distribution company profits as well as international tax issues relating to income flows and the payment of dividends. Among the topics and issues analysed in depth are the following: foreign tax credits, taxation in the digital economy, tax incentives, intellectual property, group treasury companies, mergers and acquisitions, leasing, derivatives, controlled foreign corporation provisions, VAT and customs tariffs, free trade agreements and customs unions, transfer pricing, role of tax treaties, hedging, related accounting issues, deferred tax assets and liabilities, tax risk management, supply chain management, depreciation allowances and carry forward tax losses. The book includes descriptions of 21 country tax systems and ten detailed case studies applying the analysis to specific examples. Detailed up to date attention is paid to the OECD Action Plan on Base Erosion and Profit Shifting (BEPS) and other measures against tax avoidance. As a full scale commentary and analysis of international taxation issues for multinational manufacturing groups including in depth consideration of corporate structures, tax treaties, transfer pricing and current developments, this book is without peer. It will prove of inestimable value to all accountants, lawyers, economists, financial managers and government officials working in international trade environments.

International Taxation of Energy Production and Distribution John Abrahamson, 2018-04-20. Energy is a major global industry with rapid ongoing changes in areas such as carbon taxes, emissions trading regimes and the development of renewable energy. The cross border nature of the industry calls for the thorough expert and up to date analysis provided in this timely and practical book.
