Handbook of Urban Politics and Policy Ronald K. Vogel, 2024-07-05 This authoritative Handbook provides a comprehensive overview of research into urban politics and policy in cities across the globe Leading scholars examine the position of urban politics within political science and analyse the critical approaches and interdisciplinary pressures that are broadening the field

The Routledge Companion to Urban Regeneration Michael E. Leary, John McCarthy, 2013-10-30 In the past decade urban regeneration policy makers and practitioners have faced a number of difficult challenges such as sustainability budgetary constraints demands for community involvement and rapid urbanization in the Global South Urban regeneration remains a high profile and important field of government led intervention and policy and practice continue to adapt to the fresh challenges and opportunities of the 21st century as well as confronting long standing intractable urban problems and dilemmas This Companion provides cutting edge critical review and synthesis of recent conceptual policy and practical developments within the field With contributions from 70 international experts within the field it explores the meaning of urban regeneration in differing national contexts asking questions and providing informed discussion and analyses to illuminate how an apparently disparate field of research policy and practice can be rendered coherent drawing out common themes and significant differences The Companion is divided into six sections exploring globalization and neo liberal perspectives on urban regeneration emerging reconceptualizations of regeneration public infrastructure and public space housing and cosmopolitan communities community centred regeneration and culture led regeneration The concluding chapter considers the future of urban regeneration and proposes a nine point research agenda This Companion assembles a diversity of approaches and insights in one comprehensive volume to provide a state of the art review of the field It is a valuable resource for both advanced

undergraduate and postgraduate students in Urban Planning Built Environment Urban Studies and Urban Regeneration as well as academics practitioners and politicians Public Space Design and Social Cohesion Patricia Aelbrecht, Quentin Stevens, 2019-01-22 Social cohesion is often perceived as being under threat from the increasing cultural and economic differences in contemporary cities and the increasing intensity of urban life Public space in its role as the main stage for social interactions between strangers clearly plays a role in facilitating or limiting opportunities for social cohesion But what exactly is social cohesion how is it experienced in the public realm and what role can the design of city spaces have in supporting or promoting it There are significant knowledge gaps between the social sciences and design disciplines and between academia and practice and thus a dispersed knowledge base that currently lacks nuanced insight into how urban design contributes to social integration or segregation This book brings together scholarly knowledge at the intersection of public space design and social cohesion It is based on original scholarly research and a depth of urban design practice and analyses case studies from a variety of cities and cultures across the Global North and Global South Its interdisciplinary cross cultural analysis will be of interest to academics students policymakers and practitioners engaged with a range of subject areas including urban design urban planning architecture landscape cultural studies human geography social policy sociology and anthropology It will also have significant appeal to a wider non academic readership given its topical subject matter **Adaptive Strategies for Water Heritage** Carola Hein, 2019-10-18 This Open Access book building on research initiated by scholars from the Leiden Delft Erasmus Centre for Global Heritage and Development CHGD and ICOMOS Netherlands presents multidisciplinary research that connects water to heritage Through twenty one chapters it explores landscapes cities engineering structures and buildings from around the world It describes how people have actively shaped the course form and function of water for human settlement and the development of civilizations establishing socio economic structures policies and cultures a rich world of narratives laws and practices and an extensive network of infrastructure buildings and urban form The book is organized in five thematic sections that link practices of the past to the design of the present and visions of the future part I discusses drinking water management part II addresses water use in agriculture part III explores water management for land reclamation and defense part IV examines river and coastal planning and part V focuses on port cities and waterfront regeneration Today the many complex systems of the past are necessarily the basis for new systems that both preserve the past and manage water today policy makers and designers can work together to recognize and build on the traditional knowledge and skills that old structure embody This book argues that there is a need for a common agenda and an integrated policy that addresses the preservation transformation and adaptive reuse of historic water related structures Throughout it imagines how such efforts will help us develop sustainable futures for cities landscapes and bodies of water **DIY Detroit** Kimberley Kinder, 2016-03-15 For ten years James Robertson walked the twenty one mile round trip from his Detroit home to his factory job when his story went viral it brought him an outpouring of

attention and support But what of Robertson s Detroit neighbors likewise stuck in a blighted city without services as basic as a bus line What they re left with after decades of disinvestment and decline is DIY urbanism sweeping their own streets maintaining public parks planting community gardens boarding up empty buildings even acting as real estate agents and landlords for abandoned homes DIY Detroit describes a phenomenon that in our times of austerity measures and market based governance has become woefully routine as inhabitants of deteriorating cities domesticate public services in order to get by The voices that animate this book humanize Detroit s troubles from a middle class African American civic activist drawn back by a crisis of conscience to a young Latina stay at home mom who has never left the city and whose husband works in construction to a European woman with a mixed race adopted family and a passion for social reform who introduces a chicken coop goat shed and market garden into the neighborhood These people show firsthand how living with disinvestment means getting organized to manage public works on a neighborhood scale helping friends and family members solve logistical problems and promoting creativity compassion and self direction as an alternative to broken dreams and passive lifestyles Kimberley Kinder reveals how the efforts of these Detroiters and others like them create new urban logics and transform the expectations residents have about their environments At the same time she cautions against romanticizing such acts which are after all short term solutions to a deep and spreading social injustice that demands comprehensive change

The Radical Bookstore Kimberley Kinder, 2021-03-16 Examines how radical bookstores and similar spaces serve as launching pads for social movements How does social change happen It requires an identified problem an impassioned and committed group a catalyst and a plan In this deeply researched consideration of seventy seven stores and establishments Kimberley Kinder argues that activists also need autonomous space for organizing and that these spaces are made not found She explores the remarkably enduring presence of radical bookstores in America and how they provide infrastructure for organizing gathering places retail offerings that draw new people into what she calls counterspaces Kinder focuses on brick and mortar venues where owners approach their businesses primarily as social movement tools These may be bookstores infoshops libraries knowledge cafes community centers publishing collectives thrift stores or art installations They are run by activist entrepreneurs who create centers for organizing and selling books to pay the rent These spaces allow radical and contentious ideas to be explored and percolate through to actual social movements and serve as crucibles for activists to challenge capitalism imperialism white privilege patriarchy and homophobia They also exist within a central paradox participating in the marketplace creates tensions contradictions and shortfalls Activist retail does not end capitalism collective ownership does not enable a retreat from civic requirements like zoning and donations no matter how generous do not offset the enormous power of corporations and governments In this timely and relevant book Kinder presents a necessary novel and apt analysis of the role these retail spaces play in radical organizing one that demonstrates how such durable hubs manage to persist often for decades between the spikes of public protest

Blue Economy C. Patrick Heidkamp, John

Edward Morrissey, Celine Germond Duret, 2022-12-30 This book presents state of the art perspectives on the Blue Economy. It applies important geographical and sustainability transitions perspectives and underscores how Blue Economy dynamics are situated in regional contexts and shaped by the people who live there. The book highlights the Blue Economy concept as a potential driver of regionally sensitive ecologically embedded and community focused sustainability. The scope for Blue Economy to form a core cog in our low carbon future is obvious from the potential for renewable energy production and coastal resilience building to possibilities for sustainable food production and the delivery of economic opportunities for peripheral communities. However, fundamental questions remain on how to meaningfully deliver these promises such as how to avoid embedding a model of damaging extractivism as per the terrestrial economy and how to deliver on the key social sustainability principles of human well being equity and justice when planning and developing blue economies. As the UN Decade of Ocean Science for Sustainable Development opens, this book provides a timely reminder of the richness, diversity and potential of coastal and marine spaces. It advances geographical and transdisciplinary understandings of the Blue Economy and sets a baseline for continued scholarly engagement with the Blue Economy from a variety of perspectives. This timely contribution will be of interest to policy makers, academics, industry leaders, decision makers and stakeholders working in or connected to the Blue Economy Sphere and working in the fields of Economic Geography, Regional Development, Public Policy and Planning, Environmental Studies and Coastal Zone Management. Globalization and Dynamics of Urban Production Natacha Aveline-Dubach, 2023-12-11 Over the last 20 years, urbanization processes have undergone profound transformations under the growing influence of private actors, particularly in the financial sector. This has exposed the physical environment of various cities to global capital flows, which has generated an overall rise in real estate values on a global scale. This is often disconnected from the financial capacities of local actors, primarily households, which then increases the inequalities and vulnerabilities of societies regarding financial and environmental risks. This book offers the keys to understanding these new dynamics of capital accumulation in the general built up environment of cities by taking into account the diversity of their configurations, their intensity and their urban effects according to national contexts. Beyond the cases involving the major Western countries, the initial centers of the financial industry and the theorizations on the urban, this book addresses the particular contexts of real estate production in four major regions: Northeast Asia, Southeast Asia, the Middle East and West Africa. *Critical Approaches to Heritage for Development* Charlotte Cross, John D. Giblin, 2022-12-15 This book investigates the relationship between heritage and development from the global visions articulated by UNESCO and the Sustainable Development Goals (SDGs) to local activism, livelihood innovations and political strategies employed in diverse countries of the Global South. In recent years, as culturally informed approaches to international development have become increasingly important, engaging with heritage has been seen as a way to draw on practices and meanings from the past to help build future development. This book gathers researchers and practitioners from across disciplines to address

important themes such as health the environment sustainability peace security tourism and economic growth In doing so the book asks us to consider whose past and whose future is ultimately at stake in efforts to use heritage for development Key topics explored include histories and legacies of colonialism and calls for decolonisation and related questions of expertise ownership and agency Students practitioners and researchers from across the broad areas of history heritage education archaeology geography and development studies will find this book an invaluable guide to dynamic and contested understandings of heritage and development and the relationship between them

Sustainable Cities Pierre Laconte,Chris Gossop,2016-05-31 Sustainable Cities is about the challenges faced by our urban environments and how these can be met Examining the built environment at three levels of observation individual buildings urban neighbourhoods and entire cities and towns the first part of the book reveals the scale of the task The second part of the book offer a critical assessment of the techniques used to assess urban development including the measurement of greenhouse gas emissions ecological footprint analysis and the measurement of urban biodiversity where different approaches can yield significantly different results It concludes with an alternative approach to greenhouse gases making the case for them to be seen as a resource rather than as a liability In the final part case studies of best practice are presented With contributions from a range of leading international specialists Sustainable Cities will be essential reading for academics and professionals in urban and municipal planning environmental policy and planning architecture urban geography climate change energy resources and environmental science and technology

Port Systems in Global Competition César Ducruet,Theo Notteboom,2023-08-11 In a world where most international trade is carried by sea each port can be seen as a unique chokepoint competing to attract ever more traffic and economic activities However ports can also be seen as parts of a wider system which can be defined as a system of two or more ports located in proximity within a given area Their fate and governance is jointly influenced when belonging to the same region country or transnational space Investments shocks innovations and delays occurring in one port often affect other ports within a certain spatial range and time lapse Further understanding of such co developments in port systems is necessary to go beyond local specificities through a multidisciplinary and multi level contribution Port Systems in Global Competition is an answer to the strong and urgent need for reviewing the relevant theories concepts methods and sources that can be mobilized for the analysis of port systems With contributions from reputable scholars coming from no less than 11 countries in Europe Asia and North America this book delves into the analysis of port systems from diverse disciplinary angles geography regional

science economics management engineering and mathematics computer sciences covering innovative empirical approaches to various port systems in the world The theoretical and empirical knowledge can support and enhance decision making in relation with the development of ports supply chains and transport networks in general This book is an ideal companion to academics and upper level students interested in the analysis of transport and economic systems in general as well as the effective ways to answer complex issues in transportation and socio economic development It will be a valuable resource for those researching or studying transportation and supply chains maritime and port economics as well as regional development and human geography

Global Port Cities in North America Boris Vormann, 2014-11-27 As the material anchors of globalization North America's global port cities channel flows of commodities capital and tourists This book explores how economic globalization processes have shaped these cities political institutions social structures and urban identities since the mid 1970s Although the impacts of financialization on global cities have been widely discussed it is curious that how the global integration of commodity chains actually happens spatially creating a quantitatively new global organization of production distribution and consumption processes remains understudied The book uses New York City Los Angeles Vancouver and Montreal as case studies of how once redundant spaces have been reorganized and crucially reinterpreted so as to accommodate new flows of goods and people and how in these processes social environmental and security costs of global production networks have been shifted to the public
