wheel drive transaxles This Recommended Practice had defined a test procedure and process which gave a reasonably  
complete description of the efficiency and performance of a 20th century automatic transmission With the introduction of  
electronic controls the number of parameters which control the transmission s operation have expanded extensively and  
these need to be defined for each test The interaction between the transmission the environment the engine the cooling and  
other systems have also made test definition very difficult and complex Finally the diversity the rapid changes and the  
component complexity introduced by electric and hybrid drive system combine with the above difficulties to make it  
impractical to define a Recommended Practice which could provide a meaningful description of performance and efficiency of  
21st century automotive transmissions The existing Recommended Practice J651 is being stabilized to preserve the test  
procedures for future reference     *Automatic Transmissions* H.M. Gousha Company, Chek-Chart, 1978     Automatic  
Transmissions - Manual Control Sequence Automatic Transmission and Transaxle Committee, 2017 The scope and purpose of  
this SAE Recommended Practice is to provide a standard pattern or sequence for the manual control of automatic  
transmissions in passenger cars and light duty trucks This generally refers to left hand drive mechanical shift applications  
This document is published as Stabilize The J915 content is not fully compliant with current industry developments and as  
such may require a different standard The content within the J915 standard relies on Federal Motor Vehicle Safety Standards  
FMVSS 102 and 114 Portions of the J915 standard that are unique may not represent current common practices within the  
user community When this standard was initially published it reflected a common philosophy towards automatic transmission  
manual controls sequence Since that time changing technologies like self driving cars satellite controlled driven cars and  
electric cars may have led members of the user community to have potentially divergent methods for manual controls  
sequences of automatic transmissions beyond the minimum requirements specified within the applicable Federal Motor  
Vehicle Safety Standards As a result a different standard may be required
