

The Gottman Method Cheat Sheet:

What Would John & Julie Do?

THE SOUND RELATIONSHIP HOUSE THEORY

This is the foundational framework of the Gottman Method, which visualizes a strong relationship as a house with several levels:

- **Build Love Maps:** Understanding your partner's inner world, including their hopes, dreams, and everyday experiences.
- **Share Fondness and Admiration:** Expressing affection, respect, and appreciation regularly.
- **Turn Towards Instead of Away:** Recognizing and responding positively to your partner's bids for emotional connection.
- **The Positive Perspective:** Maintaining a positive view of your partner and the relationship, especially during conflicts.
- **Manage Conflict:** Handling disagreements constructively, including accepting influence, finding compromise, and dialogue about problems.
- **Make Life Dreams Come True:** Supporting each other's aspirations and finding ways to make them a reality.
- **Create Shared Meaning:** Building a sense of shared purpose, values, and rituals of connection.

BIDS FOR CONNECTION

Recognizing and responding to "bids for connection" is crucial. Bids are attempts to gain attention, affection, or affection from your partner. Turning towards these bids strengthens emotional bonds, while turning away or ignoring them can harm the relationship.

LOVE MAPS

Building and maintaining detailed "love maps" involves knowing your partner's world — their likes, dislikes, preferences, dreams, and fears. This deep understanding fosters intimacy and connection.

EMOTION COACHING

Helping partners to become "emotion coaches" for each other involves understanding and validating each other's emotions, which enhances emotional intimacy and trust.

CONFLICT MANAGEMENT

The Gottman Method distinguishes between solvable and perpetual problems. Solvable problems can be resolved with effective communication and compromise, while perpetual problems require ongoing dialogue and understanding since they often stem from fundamental differences in personality or values.

CREATING SHARED MEANING

Developing shared rituals, goals, and values helps couples build a deeper connection and a sense of purpose in their relationship.

REPAIR ATTEMPTS

Recognizing and making repair attempts during conflict is vital. These are efforts to de-escalate tension and reconnect, which can include humor, apologies, or affectionate gestures.

TRUST AND COMMITMENT

Building trust and demonstrating commitment are essential elements. Trust is built through consistent positive interactions and reliability, while commitment involves investing in the relationship and prioritizing it, workshops.

GENTLE STARTUPS

A gentle startup involves approaching a conversation or conflict in a calm, respectful, and non-accusatory manner. It typically includes "I" statements, expressing feelings and needs without blaming.

Examples of Gentle Startups:

1. Expressing a Need Without Blame:

- "I feel overwhelmed when the house is messy. Can we work together to find a solution?"
- "I feel neglected when we don't spend time together. Can we plan a date night soon?"

2. Expressing a Feeling:

- "I feel hurt when you raise your voice. Can we talk about this calmly?"
- "I feel worried when you come home late without calling. Can you let me know if you're going to be late?"

3. Requesting a Change:

- "I feel stressed when the bills pile up. Can we create a budget together?"
- "I feel misunderstood when you interrupt me. Can you please let me finish speaking?"

4. Acknowledging the Partner's Efforts:

- "I really appreciate it when you help with the kids. Can we discuss how to share responsibilities more evenly?"

Scripts for Gentle Startups:

- "I feel [emotion] when [situation]. I need [specific request]."
- Example: "I feel anxious when I don't hear from you all day. I need us to check in with each other at least once during the day."
- "I've been feeling [emotion] about [situation]. Can we talk about it?"
- Example: "I've been feeling overwhelmed about our finances. Can we talk about how to manage our budget better?"
- "I'd like to talk about [issue]. I'm feeling [emotion] and I need [specific request]."
- Example: "I'd like to talk about our weekend plans. I'm feeling a bit left out and I need to feel more involved in the decision-making."

THE FOUR HORSEMEN OF THE APOCALYPSE

The Gottmans identified four negative communication patterns that are highly predictive of relationship breakdowns if not addressed:

1. **Criticism:** Attacking your partner's character rather than addressing specific behaviors.
2. **Contempt:** Showing disrespect, mocking, or belittling your partner, which is the most damaging of the four.
3. **Defensiveness:** Responding to complaints with counter-attacks or playing the victim to deflect blame.
4. **Stonewalling:** Withdrawing from interaction and becoming emotionally unavailable.

THE ANTIDOTES TO THE FOUR HORSEMEN

To counteract the Four Horsemen, the Gottmans recommend specific antidotes:

- **Criticism Antidote:** Use a gentle startup by focusing on your own feelings and needs without blaming.
- **Contempt Antidote:** Build a culture of appreciation and respect by expressing gratitude and admiration.
- **Defensiveness Antidote:** Take responsibility, even for a small part of the issue, to diffuse tension.
- **Stonewalling Antidote:** Practice physiological self-soothing to stay emotionally present and calm.

THE MAGIC RATIO

The Gottmans emphasize the importance of maintaining a positive interaction ratio of 5:1 — five positive interactions for every negative one. This balance helps to keep the relationship resilient and happy.

International Handbook of Behavior Modification and Therapy Alan S. Bellack,Michel Hersen,Alan E. Kazdin,2012-12-06 The rapid growth of behavior therapy over the past 20 years has been well documented Yet the geometric expansion of the field has been so great that it deserves to be recounted We all received our graduate training in the mid to late 1960s Courses in behavior therapy were then a rarity Behavioral training was based more on informal tutorials than on systematic programs of study The behavioral literature was so circumscribed that it could be easily mastered in a few months of study A mere half dozen books by Wolpe Lazarus Eysenck Ullmann and Krasner more or less comprised the behavioral library in the mid 1960s Seminal works by Ayllon and Azrin Bandura Franks and Kanfer in 1968 and 1969 made it only slightly more difficult to survey the field Keeping abreast of new developments was not very difficult as Behaviour Research and Therapy and the Journal of Applied Behavior Analysis were the only regular outlets for behavioral articles until the end of the decade when Behavior Therapy and Behavior Therapy and Experimental Psychiatry first appeared We are too young to be maudlin but Oh for the good old days One of us did a quick survey of his bookshelves and stopped counting books with behavior or behavioral in the titles when he reached 100 There were at least half again as many behavioral books without those words in the title

Handbook of Behavioural Family Therapy Ian R.H. Falloon, 2015-07-30 First published in 1988 behavioural family therapists worked in an area that had greatly changed since its inception over 20 years before Growing out of the pioneering work of Gerald Patterson Robert Paul Liberman and Richard Stuart whose backgrounds vary from psychology to

psychiatry to social work behavioural family therapy BFT had evolved to encompass systems theory considerations of the therapeutic alliance as well as approaches to accounting for and restructuring family members subjective experiences through cognitive strategies As BFT had not been the brain child of any one charismatic innovator but rather of a wide array of clinicians and researchers developing and rigorously testing hypotheses it is fitting that this much needed summation of the field was a collaborative product of an array of well established practitioners of the time They discuss in Part 1 of the book the theoretical parameters of BFT focusing on modular behavioural strategies the indications for therapy assessment of family problems pertinent issues arising in clinical practice and approaches to the problem of resistance to change Contributors to Part 2 then apply theory to such clinical situations as parent training and helping families cope with patients suffering from developmental disabilities alcoholism schizophrenia senile dementia as well as anxiety obsessive compulsive and depressive disorders Specific attention is also given to acute inpatient and primary health care settings While BFT had already proved quite effective in treating a great number of family problems it was only in its infancy at the time of writing As Falloon says in his overview all exponents of the method are constantly involved with the process of refinement each clinician is a researcher each family member is a research subject and each researcher is contributing to clinical advancement This openness in combination with a willingness to modify sacred tenets of behaviourism while adapting proven techniques from other family therapies made this title a landmark in its field As such it was not only of interest to all clinicians and researchers with a behavioural slant but also to all family therapists who wished to challenge themselves to develop an integrative approach

Handbook Of Family Therapy Alan S. Gurman, David P. Kniskern, 2014-07-22 First published in 1981 This volume is unique as to date no previous book and no collection of papers one could assemble from the literature addresses or achieves for the field of family therapy what is accomplished in this handbook It responds to a pressing need for a comprehensive source that will enable students practitioners and researchers to compare and assess critically for themselves an array of major current clinical concepts in family therapy

Mental Health also explores the role of workbooks in psychological intervention over the past decade. Although workbooks are not yet part of the mainstream of psychological intervention, they are growing in popularity as their many advantages are recognized. They are easy to use by almost any client; they are cost effective to both therapist and client in terms of money and time; they provide therapists with written assignments to use as homework for individuals, couples, and families; and they can be used in any setting, especially in computer-assisted, offline or online interventions. In addition, this book shows how workbooks can be used to administer therapy to previously unreachable clients, such as people who are reluctant to talk to an authoritative figure or a stranger, people who cannot afford face-to-face treatments, incarcerated offenders who have not been helped by talk therapies, Internet users who are searching for help via computer rather than in person. *Clinical Manual for Marital Therapy* John Mordechai Gottman, 2000

Engaging Men in Couples Therapy David Shepard, Michele Harway, 2012-03-15 This book will help practitioners overcome one of the leading challenges in couples therapy: working effectively with the male partner. Men have unique needs and psychological issues that many clinicians may not recognize or know how to address. This volume presents chapters by the leading practitioners associated with current therapeutic models, including Emotionally Focused Couple Therapy, Imago Relationship Therapy, Integrated Behavioral Couple Therapy, and more. Using in-depth case examples, they demonstrate how their approaches can be adapted to be male sensitive and respond to the ambivalence so many men experience about couples work. Special topics are also addressed, including infidelity, cultural diversity, working with veterans, and fathering issues. This book will enrich therapists' work with couples, making treatment a welcoming experience for both partners and the treatment process more gratifying for the therapist.
