instance of the European Joint Conferences on Theory and Practice of Software ETAPS is an annual federated conference that was established in 1998 by combining a number of existing and new conferences. This year it comprised five conferences: CC, ESOP, FASE, FOSSACS, TACAS, 22 satellite workshops, ACCAT, ARSPA, WITS, Bytecode, COCV, COMPASS, FESCA, FInCo, FORMED, GaLoP, GT, VMT, HFL, LDFA, MBT, MLQA, OpenCert, PLACES, QAPL, RC, SafeCert, TAASN, TERMGRAPH, and WING, four tutorials and seven invited lectures, excluding those that were specific to the satellite events. The five main conferences received 532 submissions, including 30 tool demonstration papers, 141 of which were accepted, 10 tool demos, giving an overall acceptance rate of about 26%, with most of the conferences at around 25%. Congratulations therefore to all the authors who made it to the final programme. I hope that most of the other authors will still have found a way of participating in this exciting event and that you will all continue submitting to ETAPS and contributing towards making it the best conference on software science and engineering. The events that comprise ETAPS address various aspects of the system development process, including specification, design, implementation, analysis, and improvement. The languages, methodologies, and tools which support these activities are all well within its scope. Different blends of theory and practice are represented, with an inclination towards theory, with a practical motivation on the one hand and soundly based practice on the other.

Functional and Logic Programming Tom Schrijvers, Peter Thiemann, 2012-05-20. This book constitutes the refereed proceedings of the 11th International Symposium on Functional and Logic Programming, FLOPS 2012, held in Kobe, Japan, in May 2012. The 19 research papers and 3 system demonstrations presented in this volume were carefully reviewed and selected from 39 submissions. They deal with declarative programming, including functional programming and logic programming.

Implementation of Functional Languages Markus Mohnen, Pieter Koopman, 2003-06-29. This book constitutes the thoroughly refereed post-proceedings of the 12th International Workshop on Implementing Functional Languages, IFL 2000, held in Aachen, Germany, in September 2000. The 15 revised full papers presented have gone through a thorough round of post-workshop reviewing and were selected from 33 workshop presentations. Among the topics covered are language concepts, type checking, compilation techniques, abstract interpretation, automatic program generation, abstract machine architectures, array processing, concurrent and parallel processing, heap management, runtime profiling, performance measurement, debugging, and tracing, and tools and programming techniques.

Practical Aspects of Declarative Languages Ricardo Rocha, John Launchbury, 2011-01-21. This book constitutes the refereed proceedings of the 13th International Symposium on Practical Aspects of Declarative Languages, PADL 2011, held in Austin, TX, USA, in January 2011, co-located with POPL 2011, the Symposium on Principles of Programming Languages. The 17 revised full papers presented together with one application paper were carefully reviewed and selected from 40 submissions. The volume features a variety of contributions ranging from message passing and mobile networks, concurrent and parallel programming, event processing and reactive programming, profiling and portability in Prolog, constraint programming, grammar combinators, belief set merging, and work on new

language extensions and tools
