Pediatric Health Conditions in Schools Allison G. Dempsey, 2019-10-28 As the rates of chronic health conditions in childhood increase, school-based professionals regularly encounter children with chronic health conditions in the school setting. This includes a review of common medical conditions and terminology and cross-cutting issues related to social, emotional, and academic functioning, as well as the role of the school-based professional in collaborating across systems of care. This section also reviews legal and policy issues, as well as alternative educational settings for students with chronic health needs. Section II focuses on prevention, assessment, intervention, and consultations strategies for both individual students and entire school systems. Finally, Section III includes chapters for common groups of medical conditions.
