Legal Writing Style Henry Weihofen,1980 Topics in this law school text include a section on writing law school and bar examinations amplified material on sentence structure and organization and drafting principles The book is equally suited for use in courses that concentrate on brief writing emphasize formal legal documents or concentrate on the writing of memoranda or papers similar to law review comments Also includes chapters on forcefulness arranging words for emphasis Opinions and The Jurisdictional statement **Waiting for Dead Men's Shoes** Donald Chisholm,2001 This monumental study provides an innovative and powerful means for understanding institutions by applying problem solving theory to the creation and elaboration of formal organizational rules and procedures Based on a meticulously researched historical

analysis of the U S Navy s officer personnel system from its beginnings to 1941 the book is informed by developments in cognitive psychology cognitive science operations research and management science It also offers important insights into the development of the American administrative state highlighting broader societal conflicts over equity efficiency and economy Considering the Navy s personnel system as an institution the book shows that changes in that system resulted from a long term process of institutional design in which formal rules and procedures are established and elaborated Institutional design is here understood as a problem solving process comprising day to day efforts of many decision makers to resolve the difficulties that block completion of their tasks The officer personnel system is treated as a problem of organized complexity with many components interacting in systematic intricate ways its structure usually imperfectly understood by the participants Consequently much problem solving entails decomposing the larger problem into smaller more manageable components closing open constraints and balancing competing value premises The author finds that decision makers are unlikely to generate many alternatives since searching for existing solutions elsewhere or inventing new ones is an expensive difficult enterprise Choice is usually a matter of accepting rejecting or modifying a single solution Because time constraints force decisions before problems are well structured errors are frequently made problem components are at best only partially addressed and the chosen solution may not solve the problem at all and even if it does is likely to generate unanticipated side effects that worsen other problem components In its definitive treatment of a critical but hitherto entirely unresearched dimension of the administration of the U S Navy the book provides full details over time concerning the elaboration of officer grades and titles creation of promotion by selection sea duty requirements graded retirement staff line conflicts the establishment of the Reserve and such unusual subjects as tombstone promotions In the process it transcends the specifics of the personnel system to give a broad picture of the Navy s history over the first century and a half of its development Resources in Education ,1994 *The Autocar* ,1908
