[The Status of Student Involvement in University Governance in Kenya](#) Mulinge, Munyae M., Arasa, Josephine N., 2017-05-05 This book examines the concept of the democratization of governance in universities in Kenya with particular emphasis on students' involvement in governance processes and decision making. Data were collected from members of the student community utilizing a structured self-administered questionnaire and from purposively selected key informants and focus group discussants drawn from Kenyatta University representing the public sector and the United States International University representing the private sector. The guiding argument for the study was that shared governance, one of the principles of good governance, is critical in enabling the universities to deliver their visions and the missions effectively. The results revealed that while in principle Kenyan universities have embraced democratic governance in which all stakeholders including students have a role to play, in practice they continue to violate the core principles of good governance, particularly shared governance. Specifically, students who are major stakeholders in university education are largely excluded from significant structures of governance, thereby limiting their influence and participation. Although their representation is mainly provided via student self-governance organs, unions, associations, and/or councils, their effectiveness is undermined considerably by the lack of trust and confidence of the student body and the unending manipulation by top university administrators and external political actors. Student active involvement in decision making is mainly confined to

lower levels such as the school faculty and departmental programme The authors call for a paradigm shift in the involvement of students in the governance of universities in ways that discourage the current culture of tokenism and political correctness that characterizes public and private universities in Kenya *Report of the 2020 WASAG Webinar Series Food and Agriculture Organization of the United Nations, 2024-02-05* In 2020 amidst the challenges posed by the COVID 19 epidemiological situation the Global Framework on Water Scarcity in Agriculture WASAG has continued to work on addressing pressing issues related to water scarcity in agriculture in a changing climate WASAG organized a series of webinars to pursue its mandate under new digital means as webinars were recognized as an opportunity to quickly adapt to the new current challenges Using the combine expertise and resources of its many Partners WASAG presented a variety of topics related to water scarcity and agriculture to WASAG Partners stakeholders and the interested public These topics included water and gender financing mechanisms water and nutrition drought preparedness sustainable agriculture water use and saline agriculture which also include promoting quinoa as a drought and salt tolerance crop With ten webinars organized between May and December 2020 this report highlights the key messages given by a wide variety of speakers that participated in making this new initiative a real success It is expected that this report will lead to more in depth capacity development in the several topics discussed to collaboration in developing and implementing projects addressing these topics and to offering a variety of innovative solutions to the communities countries and regions that have to cope with water scarcity in agriculture Information, Knowledge, and Technology for Teaching and Research in Africa Dennis Ocholla, Omwoyo Bosire Onyancha, Aderonke Olaitan Adesina, 2024-06-01 This book focuses on human machine interaction and user interfaces for teaching and research in Africa The importance of digital humanities DH is recognized by focusing on the theoretical and historical development of DH in the context of LIS education and how infrastructure influences DH programs initiatives in respective LIS schools These findings and recommendations provide valuable knowledge for developing the domain and establishing potential areas of collaboration in DH research and curriculum The book explores and explicates what the Diffusion of Innovations theory is about as well as the characteristics of innovators The Diffusion of Innovations theory is relevant to the LIS field which has widely adopted numerous innovations to automate a wide range of administrative and technical processes build databases and networks and provide better services to library users The diffusion and adoption of technology have become imperative for the efficient management of modern libraries and LIS as a field in general Existing literature that is related to the adoption use and challenges facing the development of clinical informatics in teaching hospitals in developing countries is reviewed It is also revealed that hospitals in developing countries should embrace the use of tools for effective healthcare delivery and that nursing informatics is very significant in nursing practice In addition the role of academic institutions and the use of information and communication technologies ICTs by librarians for information and knowledge IKM in such institutions in the Fourth Industrial Revolution 4IR is addressed The
