The British Television Pilot Episodes Research Guide 1936-2015 Christopher Perry, 2015-12 A new idea can become an expensive flop for TV executives So from the earliest days of television the concept of a pilot episode seemed like a good idea Trying out new actors new situations and new concepts before making a series was good economical sense It was also tax deductible Sometimes these pilots were shown on television sometimes they were so awful they were hidden from sight in archives and sometimes they were excellent one offs but a series seemed elusive and never materialised Chris Perry has always been fascinated by the pilot episode So many pilots are made annually but never seen by audiences Only a handful appear on screen It s a hidden world of comedy variety drama and factual programming This volume attempts to lift the lid on the world of the TV pilot by revealing the many transmitted and untransmitted episodes made through the decades

Catalog of Copyright Entries. Third Series Library of Congress. Copyright Office, 1970 [What It Is Like To Perceive](#) J. Christopher Maloney, 2018-06-15 Naturalistic cognitive science when realistically rendered rightly maintains that to think is to deploy contentful mental representations Accordingly conscious perception memory and anticipation are forms of cognition that despite their introspectively manifest differences may coincide in content Sometimes we remember what we saw other times we predict what we will see Why then does what it is like consciously to perceive differ so dramatically from what it is like merely to recall or anticipate the same Why if thought is just representation does the phenomenal character of seeing a sunset differ so stunningly from the tepid character of recollecting or predicting the sun's descent J Christopher Maloney argues that unlike other cognitive modes perception is in fact immediate direct acquaintance with the object of thought Although all mental representations carry content the vehicles of perceptual representation are uniquely composed of the very objects represented To perceive the setting sun is to use the sun and its properties to cast a peculiar cognitive

vehicle of demonstrative representation This vehicle s embedded referential term is identical with and demonstrates the sun itself And the vehicle s self attributive demonstrative predicate is itself forged from a property of that same remote star So in this sense the perceiving mind is an extended mind Perception is unbrokered cognition of what is real exactly as it really is Maloney s theory of perception will be of great interest in the philosophy of mind and cognitive science Television & Cable Factbook ,2002 **Television Comedy Series** Joel Eisner,David Krinsky,1984 Guide to the syndicated sitcoms **Exhibitors Daily Review** ,1923 **Daily Variety** ,1960 **Oxford Textbook of Medicine** David A.
