Technologies and Management Strategies for Hazardous Waste Control United States. Congress. Office of Technology Assessment, 1983 *Waste Reduction for Pollution Prevention* P. N. Cheremisinoff, L. M. Ferrante, 2013-10-22 Waste Reduction for Pollution Prevention discusses the philosophy regulatory background and technical options dealing with waste minimization The book explains waste reduction as a form of pollution prevention to minimize the amount of hazardous materials dumped into the environment The 1984 Resource Conservation and Recovery Act amendments restrict the amount of waste that can be disposed on land The approach of the United States is to address pollution after the problem has been created where attention and resources of industry shift to regulatory compliance The text notes that waste reduction is the key to preventing future hazardous waste problems Examples of techniques of waste minimization are good housekeeping changes in technology and procedures raw material substitution recycling and waste exchanges The book discusses the biological thermal and other emerging thermal processes for industrial waste management as well as municipal solid waste recycling and the organization of a recycling program The

Concrete in the Service of Mankind Ravindra Dhir, Thomas Dyer, 1996-06-13 Concrete is ubiquitous and unique found in every developed and developing country Indeed there are no alternatives to concrete as a volume construction material for infrastructure This raises important questions of how concrete should be designed and constructed for cost effective use in the the short and long term and to encourage further radical development Equally it must be environmentally friendly during manufacture in an aesthetic presentation in structures and

in the containment of harmful materials The central theme of the Congress is Concrete in the Service of Mankind under which five self contained Conferences each dealing with a particular aspect are planned The Congress offers opportunity to discuss how to improve and extend this service to mankind using responsible exploitation underwritten by sound technical understanding and research base It brings together the shared skills and experience of the various disciplines involved in the construction process world wide This major publication continues the tradition established by Dundee University of organizing major international conferences every three years dealing with some aspect of concrete and also the link between Spon and Dundee University for publication of the proceedings This book should be of interest to concrete technologists contractors civil engineers consultants government agencies research organizations China's Technological Catch-Up Strategy Michael T. Rock, Michael Toman, 2015-02-09 Prior to 1979 China had a bifurcated and geographically dispersed industrial structure made up of a relatively small number of large scale state owned enterprises in various industries alongside numerous small scale energy intensive and polluting enterprises Economic reforms beginning in 1979 led to the rapid expansion of these small scale manufacturing enterprises in numerous energy intensive industries such as aluminum cement iron and steel and pulp and paper Subsequently the government adopted a new industrial development strategy labeled grasp the large let go the small The aims of this new policy were to close many of the unprofitable small scale manufacturing plants in these and other industries create a small number of large enterprises that could compete with OECD multinationals entice these larger enterprises to engage in high speed technological catch up and save energy China's Technological Catch Up Strategy traces the impact of this new industrial development strategy on technological catch up energy use and CO₂ emissions In doing so the authors explore several detailed enterprise level case studies of technological catch up develop industry wide estimates of energy and CO₂ savings from specific catch up interventions and present detailed econometric work on the determinants of energy intensity The authors conclude that China's strategy has contributed to substantial energy and CO₂ savings but it has not led to either a peaking of or a decline in CO₂ emissions in these industries More work is needed to cap and reduce China's CO₂ emissions *Mineral Trade Notes* United States.
