that it had been managing on behalf of the Air Ministry The Solihull factory was not only new it was huge Its size presented Rover with a welcome opportunity for expansion but first the company had to get back into the game With no new car designs ready Rover s only option was to re start production with mildly improved versions of their pre war models New models were a long time coming Early ideas focused on a small economy car but it soon became clear that this was not what the public wanted Meanwhile ambitious plans for a new and ultra modern car using mechanical elements that had been under development before the war had to be put back when there were delays in designing a satisfactory modern body style As a temporary measure Rover added their new mechanical elements to modified pre war style bodies to deliver the P3 models in 1948 The solution was unexpected Rover s Chief Engineer had bought a war surplus Jeep for his own use and he quickly realised that Rover could easily build something similar that civilian users both at home and abroad would find useful Combining their new engine with the simplest of chassis and body to save time and costs Rover had the Land Rover ready shortly after the new P3 and its immediate world wide success took them by surprise It had plans too far too many to put into production There were gas turbine powered cars inspired by the company s wartime jet engine work there was a hybrid of Rover car and Land Rover called the Road Rover and there were ideas for expanding the existing model ranges and adding more By 1953 when the story told in this book ends Rover was ready to introduce new saloons and Land Rovers that would see it comfortably through the 1950s Not only had it survived but it was in better health than ever before **British Car Advertising of the 1960s** Heon Stevenson,2015-03-27 During the 1960s the automobile finally secured its position as an indispensable component of daily life in Britain Car ownership more than doubled from approximately one car for every 10 people in 1960 to one car for every 4 8 people by 1970 Consumers no longer asked Do we need a car but What car shall we have This well illustrated history analyzes how both domestic car manufacturers and importers advertised their products in this growing market identifying trends and themes Over 180 advertisement illustrations are included *Complete Book of Collectible Cars* Richard M.
