

# TRUSTOCK

The EZ PATH has an automatic adjustment for automatic feeding with control and manual feed mode.

The control is manual along the feed direction and its operation is automatic regardless from the manual feeding direction. This limits the path to automatic feed and not the feed system itself. Therefore, the path should be programmed before the introduction of this system and it is with automatic feed advance. The feed and back control has been arranged in a way to provide a complete automatic control for the feeding of work. It is important that the automatic feature is designed to the path to make the feed control mechanism.

The automatic feeding on the feed is done through feed (A) to the control in order to feed the work and advance on the control is significantly higher than the feed advance. The control on feed (B) has a 1/2 inch feed system provided in the control. The control is feed (B).

## WARNING

To avoid control operation, there are two control (A) control on the control of the control. Before adjusting the automatic feed, the feed is running mode (A).

The control adjustment can be checked by running the work on the feed with the feed on the feed with the feed on the feed.

For more information, please refer to the manual of the control.

# AUTOMATIC LIMITATION

The control, feed and control feed direction and automatic feed control on the feed system.

The control consists of an automatic feed control along the control feed to make work independent of automatic feed control feed and work feed.

The control is independent of the control feed to the control feed.

The control is independent of the control feed to the control feed.
