**Interrogating Reorganisation of States** Asha Sarangi, Sudha Pai, 2020-11-29 The volume analyses the complex historical and political context for the processes of state formation in independent India. It provides both a conceptual and empirical framework for an understanding of Indian democracy through the perspective of reorganisation of states. Following the recommendations of the States Reorganisation Commission SRC in 1956, the territorial boundaries of the states were redrawn. However, within a decade, the geo-linguistic and cultural ideological criteria could not be considered satisfactory for the future division of states. With the formation of three new states Chhattisgarh, Uttarakhand, and Jharkhand, and the demand for Telangana statehood not accepted, as yet new dimensions and perspectives about state formation as a critical political practice have surfaced yet again in contemporary India. The book addresses a number of significant themes related to states reorganisation and its effects: questions of underdevelopment, size, political participation, governance, cultural identities, and also analyses the demand for smaller states. It focuses on different states, their historical and contemporary trajectory leading to the demand for territorial remapping, and thus recognising specific political and cultural resources and identities in the regions and sub-regions of states in India. The book will be useful for those studying politics, history, sociology, comparative politics, and South Asian Studies.

**The Sacred Books of the East: General index to the names and subject matter of the Sacred books of the East**, 1910 **Respectably Catholic and Scientific** Alexander Pavuk, 2021-09-24 Respectfully Catholic and Scientific traces the unexpected manner in which several influential liberal progressive Catholics tried to shape how evolution and birth control were framed and debated in the public square in the era between the World Wars and the unintended consequences of their efforts A small but influential cadre of Catholic priests professionally trained in social sciences Frs John Montgomery Cooper John A Ryan and John A O'Brien gained a hearing from mainline public intellectuals largely by engaging in dialogue on these topics using the lingua franca of the age science to the near exclusion of religious argumentation The Catholics approach was more than just tactical It also derived from the subtle influence of Catholic theological Modernism with its strong enthusiasm for science and from an inclination toward scientism inherited from the Progressive Era's social science milieu All three shared a fervent desire to translate the Catholic ethos as they understood it into the vocabulary of the modern age while circumventing anti-Catholic attitudes in the process However their method resulted in a series of unintended consequences whereby their arguments were not infrequently co-opted and used against both them and the institutional church they served Alexander Pavuk considers the complex role of both liberal religious figures and scientific elites in evolution and birth control discourse and how each contributed in unexpected ways to the reconstruction of those topics in public culture The reconstruction saw the topics themselves shift from matters considered largely within moral frameworks into bodies of knowledge
