Handbook of Spices in India: 75 Years of Research and Development P N Ravindran, K Sivaraman, S Devasahayam, K Nirmal Babu, 2024-06-24 This compendium presents comprehensive information on more than 25 important spice crops commercially grown in India and traded globally apart from over 40 spices that have the potential to be popularized. In 70 chapters the book covers the achievements in research and development made in India for the past 75 years in various organizations including research institutes, agricultural universities and private sector laboratories. Spices are natural products of plant origin used primarily for flavouring and seasoning or for adding pungency and flavour to foods and beverages. The flavour and fragrance of Indian spices had a magic spell on human culture since very ancient days. The importance of spices in Indian life and its contribution to the economy are substantial. India as the world's leading producer of spices is also a significant stakeholder in spices export trade globally. Indian spices being sources of many high value compounds are also gaining much importance for other diversified uses especially for their pharmaceutical and nutraceutical properties. A wide variety of 52 spices are grown in India including black pepper, chillies, cardamom, ginger, turmeric, cinnamon, nutmeg, garlic, onion, cumin, coriander, saffron and vanilla. This book compiles a comprehensive holistic review on the subject written by the best experts in the field in India representing diverse agencies. This book is a single point reference book for all those involved in the research, study, teaching and use of spices in India and abroad.

Handbook of Neuroengineering Nitish V. Thakor, 2023-02-02 This Handbook serves as an authoritative reference book in the field of Neuroengineering. Neuroengineering is a very exciting field that is rapidly getting established as core subject matter for research and education. The Neuroengineering field has also produced an impressive array of industry products and clinical applications. It also serves as a reference book for graduate students, research scholars and teachers. Selected sections or a compendium of chapters may be used as reference book for a one or two semester graduate course in Biomedical Engineering. Some academicians will construct a textbook out of selected sections or chapters. The Handbook is also meant as a state of the art volume for researchers. Due to its comprehensive coverage, researchers in one field covered by a certain section of the Handbook would find other sections valuable sources of cross reference for information and fertilization of interdisciplinary ideas. Industry researchers as well as clinicians using neurotechnologies will find the Handbook a single source for foundation and state of the art applications in the field of Neuroengineering. Regulatory agencies, entrepreneurs, investors and legal experts can use the Handbook as a reference for their professional work as well.
