Instruments and warning/indicator lights

Instruments

Instrument cluster and controls

The instrument cluster is your central source of information.

Fig. 2 Overview of the instrument cluster

- ① Coolant temperature gauge 1.1
- ② Tachometer (engine rev counter) .. 1.2
- ③ Turn signals 4.3
- ④ Display with:
 - Driver information system 2.3
 - Warning/indicator lights 1.1
- ⑤ Tachometer
- ⑥ Fuel gauge 1.2

① Tip

The instrument illumination (for dials and needles) turns on when the ignition is on and the vehicle lights are turned off. As the daylight fades, the illumination of the dials likewise dims automatically and will go out completely when the outside light is very low. This feature is meant to remind you to switch on the headlights when outside light conditions become poor.

Engine coolant temperature gauge

The engine coolant gauge ① in fig. 2 only works when the ignition is on. To prevent damage to your engine, please note the following important points:

Engine cold

If only the LEDs at the bottom of the gauge turn on, the engine has not reached operating temperature yet. Avoid high engine speeds, heavy engine loads and heavy throttle applications.

Normal temperature

The engine has reached its operating temperature once the LEDs up to the center of the gauge turn on under normal driving conditions. The LEDs higher up may turn on when the engine is under heavy load or the exterior temperature is high. This is no need to worry as long as the  warning light in the instrument cluster does not illuminate. If the LEDs in the upper area of the display and the indicator light  in the instrument cluster display turn on, the coolant temperature is too high
→ page 1.6.

⚠ WARNING

- Always observe the warning in
→ page 2.2.9, Engine compartment, before opening the hood and checking the engine coolant level.
