Shell Structures: Theory and Applications Volume 4 Wojciech Pietraszkiewicz, Wojciech Witkowski, 2017-10-30

Shells are basic structural elements of modern technology and everyday life. Examples of shell structures in technology include automobile bodies, water and oil tanks, pipelines, silos, wind turbine towers, and nanotubes. Nature is full of living shells such as leaves of trees, blooming flowers, seashells, cell membranes, or wings of insects. In the human body, arteries, the eye, shell, the diaphragm, the skin, and the pericardium are all shells as well. *Shell Structures Theory and Applications Volume 4* contains 132 contributions presented at the 11th Conference on Shell Structures Theory and Applications, Gdansk, Poland, 11-13 October 2017. The papers reflect a wide spectrum of scientific and engineering problems from theoretical modelling through strength, stability, and dynamic behaviour, numerical analyses, biomechanic applications, up to engineering design of shell structures. *Shell Structures Theory and Applications Volume 4* will be of interest to academics, researchers, designers, and engineers dealing with modelling and analyses of shell structures. It may also provide supplementary reading to graduate students in Civil, Mechanical, Naval, and Aerospace Engineering.

Psychological status of medical workers throughout the COVID-19 pandemic and beyond: Mental health emergence, prevalence and interventions Lawrence T. Lam, Prasuna

Reddy, 2023-04-24 **Dressing Global Bodies** Beverly Lemire, Giorgio Riello, 2019-11-19 *Dressing Global Bodies* addresses the complex politics of dress and fashion from a global perspective spanning four centuries, tying the early global to more contemporary times to reveal clothing practice as a key cultural phenomenon and mechanism of defining one's identity. This collection of essays explores how garments reflect the hierarchies of value, collective and personal inclinations, religious norms, and conversions. Apparel is now recognized for its seminal role in global colonial and postcolonial engagements and for its role in personal and collective expression. Patterns of exchange and commerce are discussed by contributing authors to analyse powerful and diverse colonial and postcolonial practices. This volume rejects assumptions surrounding a purportedly all-powerful Western metropolitan fashion system and instead aims to emphasize how diverse populations seized agency through the fashioning of dress. *Dressing Global Bodies* contributes to a growing scholarship considering gender and race, place and politics through the close critical analysis of dress and fashion. It is an indispensable volume for students of history and especially those interested in fashion, textiles, material culture, and the body across a wide time frame. Rules Lorraine Daston, 2023-08-08 In *Rules*, historian Lorraine Daston traces their development in the Western tradition and shows how rules have evolved from ancient to modern times. Drawing on a rich trove of examples including legal treatises, cookbooks, military manuals, traffic regulations, and game handbooks. **From the Indian Ocean to the Mediterranean** Sebouh David Aslanian, 2011 Drawing on a rich trove of documents including correspondence not seen for 300 years, this study explores the emergence and growth of a remarkable global trade network operated by Armenian silk merchants from a small outpost in the Persian Empire. Based in New Julfa, Isfahan, in what is now

Iran these merchants operated a network of commercial settlements that stretched from London and Amsterdam to Manila and Acapulco The New Julfan Armenians were the only Eurasian community that was able to operate simultaneously and successfully in all the major empires of the early modern world both land based Asian empires and the emerging sea borne empires astonishingly without the benefits of an imperial network and state that accompanied and facilitated European mercantile expansion during the same period This book brings to light for the first time the trans imperial cosmopolitan world of the New Julfans Among other topics it explores the effects of long distance trade on the organization of community life the ethos of trust and cooperation that existed among merchants and the importance of information networks and communication in the operation of early modern mercantile communities **Black Bodies, White Gold** Anna

Arabindan-Kesson,2021-03-22 In *Black Bodies White Gold* Anna Arabindan Kesson uses cotton a commodity central to the slave trade and colonialism as a focus for new interpretations of the way art commerce and colonialism were intertwined in the nineteenth century Atlantic world In doing so Arabindan Kesson models an art historical approach that makes the histories of the Black diaspora central to nineteenth century cultural production She traces the emergence of a speculative vision that informs perceptions of Blackness in which artistic renderings of cotton as both commodity and material became inexorably tied to the monetary value of Black bodies From the production and representation of negro cloth the textile worn by enslaved plantation workers to depictions of Black sharecroppers in photographs and paintings Arabindan Kesson demonstrates that visuality was the mechanism through which Blackness and cotton became equated as resources for extraction In addition to interrogating the work of nineteenth century artists she engages with contemporary artists such as Hank Willis Thomas Lubaina Himid and Yinka Shonibare CBE RA who contend with the commercial and imperial processes shaping constructions of Blackness and meanings of labor *Principles and Practice of Geriatric Psychiatry* Marc E.

Agronin,Gabe J. Maletta,2012-03-28 Many elderly patients suffer from psychiatric conditions that result from or are made worse by existing medical conditions This new edition integrates clinical expertise needed to evaluate and treat psychiatric medical and neurologic disorders in the older patient Both scientific foundations of and clinical approaches to psychiatric disease are discussed by a range of experts who rely on evidence based clinical guidelines and outcomes data Most chapters include case studies that illuminate the approaches to diagnosis and treatment The book s five sections include basic principles of evaluation and treatment for specific disorders appendices offer further insight into pharmacotherapy and neuroanatomic foundation of psychiatric diseases *Inventing the World* Meredith Small,2020-12-01 An epic cultural

journey that reveals how Venetian ingenuity and inventions from sunglasses and forks to bonds and currency shaped modernity How did a small isolated city with a population that never exceeded 100 000 even in its heyday come to transform western civilization Acclaimed anthropologist Meredith Small the author of the groundbreaking *Our Babies Ourselves* examines the the unique Venetian social structure that was key to their explosion of creativity and invention that ranged from

the material to social Whether it was boats or money medicine or face cream opera semicolons tiramisu or child labor laws these all originated in Venice and have shaped contemporary notions of institutions and conventions ever since The foundation of how we now think about community health care money consumerism and globalization all sprung forth from the Laguna Veneta But Venice is far from a historic relic or a life sized museum It is a living city that still embraces its innovative roots As climate change effects sea level rises Venice is on the front lines of preserving its legacy and cultural history to inspire a new generation of innovators

A Revolution in Colour Giorgio Riello, Maria Hayward, Ulinka Rublack, 2024-09-19 This major volume aims to re colour the European world of dress c 1300 1800 New dyes created one of the most important visual experiences of the period yet their story has been side lined by a focus on visual experiences shaped by the high arts Meanwhile theatrical productions and period films still abound with broad assumptions about the growing dominance of black clothing for elites during the period while ordinary people are imagined having worn coarse greys and bleached garments This volume presents clear evidence that even the clothing of the middle classes could be much more expensive than paintings and that coloured clothing and accessories were ubiquitous across society Contributors shed new light on the economic environmental and cultural dimensions of colour in dress The range of dyes expanded considerably in the sixteenth and seventeenth centuries drawing on Asian and Mediterranean knowledge new collections of recipes and the greater diversity of plants available through New World trade Working creatively with organic plant animal and mineral materials to make colours involved considerable knowledge pleasure and skill The creation of colour through dyes thus reveals a whole range of global agricultural and craft technologies that can inspire future material worlds and transforms our understanding of Europe s cultural heritage

The Spinning World Giorgio Riello, Prasanna Parthasarathi, 2011-09-22 This collection of essays examines the history of cotton textiles at a global level over the period 1200 1850 It provides new answers to two questions what is it about cotton that made it the paradigmatic first global commodity And second why did cotton industries in different parts of the world follow different paths of development

Shoes and the Georgian Man Matthew McCormack, 2024-12-12 Shoes are everyday objects but they are loaded with meaning This book reveals how shoes played a powerful role in the wider story of shifts in gender relations in 18th century Britain It focuses on the relationship of shoes with the body and its movements and therefore how what we wear on our feet relates closely to social occupational and gender roles It also uses footwear to explore topics such as politics war dance and disability Thinking about shoes as material objects McCormack studied historic shoes first hand in museums in order to ascertain their physical properties and what they would have been like to wear Worn shoes preserve traces of the wearer s body in their indentations stretches and scuffs providing a unique primary source about their wearer

This approach forges new connections between the histories of material culture, gender and the body and sheds new light on what it meant to be a man in the 18th century Clinical Toxicology of Commercial Products Robert E. Gosselin, 1976

Breve historia de la moda Giorgio Riello, 2016-04-01 Contrariamente a su fama de superficial y efímera, la moda ha jugado un papel importante en procesos de cambio histórico y representa una compleja realidad donde confluyen fuerzas económicas, políticas y sociales. Su relación ha tenido con las jerarquías sociales, el género, el deporte o las subculturas urbanas. Giorgio Riello nos lo cuenta en este peculiar y entretenido viaje sociológico a través de la historia de los múltiples integrantes y rostros de la moda. Su relato que desmonta algunas de las creencias más arraigadas en torno a la moda, lo protagonizan sus creadores pero también nos vincula a todos nosotros. Para Riello, la moda es motor de procesos de socialización e individualización y por ello su historia se convierte en la de aquellos que hacen moda y todas sus identidades. Una visión cercana y contemporánea contada de manera magnífica en esta deliciosa obra que se inicia en la época medieval y acaba en la moda globalizada actual y a la que acompañan las espléndidas ilustraciones de Lara Costafreda *The British Library General Catalogue of Printed Books to 1975* British Library (London), Jim Emmett, 1979 *The National Union Catalogs, 1963-1964* **Machinery Market**, 1944-07 **Dictionary Catalog of the Research Libraries of the New York Public Library, 1911-1971** New York Public Library.
