**The Oxford Handbook of Ritual and Worship in the Hebrew Bible** Samuel E. Balentine, 2020-09-16 Ritual has a primal connection to the idea that a transcendent order numinous and mysterious supranatural and elusive divine and wholly other gives meaning and purpose to life The construction of rites and rituals enables humans to conceive and apprehend this transcendent order to symbolize it and interact with it to postulate its truths in the face of contradicting realities and to repair them when they have been breached or diminished This Handbook provides a compendium of the information essential for constructing a comprehensive and integrated account of ritual and worship in the ancient world Its focus on ritual and worship from the perspective of biblical studies as opposed to religious studies highlights that the world of ritual and worship was a topic of central concern for the people of the Ancient Near East including the world of the Bible Given the scarcity of the material in the Bible itself the authors in this collection use materials from the ancient Near East to provide a larger context for the practices of the biblical world giving due attention to historical anthropological and social scientific methods that inform the context of biblical worship The specifics of ritual and worship life the sacred spaces times and actors in worship are examined in detail with essays covering both the divine and human aspects of the sacred dimension The Oxford Handbook of Ritual and Worship in the Hebrew Bible considers several underlying concepts of ritual practice and closes with a theological outlook on worship and ritual from a variety of perspectives demonstrating a fruitful exchange between biblical studies ritual theory and social science research

**Ethics** Kenneth R. Valpey,2019-11-02 This open access book provides both a broad perspective and a focused examination of cow care as a subject of widespread ethical concern in India and increasingly in other parts of the world In the face of what has persisted as a highly charged political issue over cow protection in India intellectual space must be made to bring the wealth of Indian traditional ethical discourse to bear on the realities of current human animal relationships particularly those of humans with cows Dharma yoga and bhakti paradigms serve as starting points for bringing Hindu particularly Vaishnava Hindu animal ethics into conversation with contemporary Western animal ethics The author argues that a culture of bhakti the inclusive empathetic practice of spirituality centered in Krishna as the beloved cowherd of Vraja can complement recently developed ethics of care thinking to create a solid basis for sustaining all kinds of cow care communities

becoming more and more important Theoretically and practically the study of social phenomena and social problems and the development of prosperous social sciences are the eternal themes of human beings At present social science research and its results can hardly meet the needs of social development especially the unscientific evaluation of social science results which has aroused great concern from all walks of life and has produced dirt and questions on social science thus affecting the proper development of social science Max Weber once said that the most important function of social science in modern times is to keep people clear headed and to resist the delusions of prophetic legislators Humanities and arts are the process of perceiving realizing thinking manipulating and expressing objective or subjective objects through capturing and excavating feeling and analyzing integrating and applying or displaying the stage results in the form obtained through feeling seeing hearing smelling touching The social sciences and humanities and arts contain content that will directly affect our lives and the way society functions And by reacting to today s increasingly intricate problems and situations through systematic and professional discussions they will further contribute to the improvement of institutions and the development of society By thinking about issues and looking at problems and the world from different perspectives by putting the two together it may be possible to have more comprehensive appropriate and better responses for example the development of laws requires a deeper understanding of the environment in which they are implemented international trade requires a certain understanding of the customs of different countries and the development of tax and economic policies requires a certain understanding of the population consumer demand etc
