by women due largely to their reduced mobility and lack of control over assets In post disaster settings women s vulnerabilities increase due to gendered rescue and rehabilitation practices As such a gendered approach to land rights is critical to disaster preparedness and recovery      *Management* Stephen P. insights that will help those responsible across the international financial planning community to establish relevant accurate and meaningful professional standards for financial planners The authors employ the relatively new research methodology of phenomenography which enables them to describe the qualitatively different ways in which people understand or experience a phenomenon This particularly lends itself to the study of a concept such as professionalism This study gives voice to the financial planners represented in the research and will inform standard setting bodies seeking to understand professionalism through the eyes of the professionals themselves What the research reveals about the concept of professionalism itself will be of value to those whose interests lie beyond the world of financial planning and the application of the methodology used in the study will inform researchers contemplating phenomenographical studies elsewhere *Financial Literacy Education* Asta Zokaityte, 2017-06-26 This book explores the issue of consumer financial education responding to increased interest in and calls to improve peoples financial literacy skills and abilities to understand and manage their money New conceptual frameworks introduced in the book offer academic audiences an innovative way of thinking about the project on financial literacy education Using the concepts of edu regulation and financial knowledge democratisation to analyse the financial education project in the UK the book exposes serious and often ignored limitations to using information and education as tools for consumer protection It challenges the mainstream representation of financial literacy education as a viable solution to consumer financial exclusion and poverty Instead it argues that the project on financial literacy education fails to acknowledge important dependences between consumer financial behaviour and the socio economic political and cultural context within which consumers live Finally it reveals how these international and national calls for ever greater financial education oversimplify and underestimate the complexity of consumer financial decision making in our modern times
