**Semantics and Psychology of Spirituality** Heinz Streib, Ralph W. Hood, Jr., 2015-10-16 This book examines what people mean when they

say they are spiritual It looks at the semantics of spirituality the visibility of reasons for spiritual preference in biographies in psychological dispositions in cultural differences between Germany and the US and in gender differences It also examines the kind of biographical consequences that are associated with spirituality The book reports the results of an online questionnaire filled out by 773 respondents in Germany and 1113 in the US personal interviews with a selected group of more than 100 persons and an experiment Based on the data collected it reports results that are relevant for a number of scientific and practical disciplines It makes a contribution to the semantics of everyday religious language and to the cross cultural study of religion and to many related fields as well because spirituality is evaluated in relation to personality mysticism well being religious styles generativity attachment biography and atheism The book draws attention to the new and ever changing ways in which people give names to their ultimate concern and symbolize their experiences of transcendence

**The Five-Factor Model of Personality Across Cultures** Robert R. McCrae, Juri Allik, 2012-12-06  
ROBERT R MCCRAE it is simply personality research conducted in different countries The implicit assumption behind this practice is that personality processes are universal and where they are studied is thus of no consequence An insensitivity to cultural context once imputed mostly to Americans now appears to characterize the field worldwide Fortunately recent years have also seen a rise of interest in studies of personality and culture Church 2001 Church Lee McCauley McCrae 2000 What do these new studies show Are personality processes indeed universal or are there significant variations across cultures that necessitate a more nuanced approach to research There is as yet no definitive answer to that question In some respects human personality does seem to transcend the boundaries of language and culture in other respects it is profoundly influenced by social and historical forces Sorting these issues out must be a priority for our field if we are to understand the current personality literature

*Cognitive Activation in the Mathematics Classroom and Professional Competence of Teachers* Mareike Kunter, Jürgen Baumert, Werner Blum, Ute Klusmann, Stefan Krauss, Michael Neubrand, 2013-03-29 This work reports the findings of the Professional Competence of Teachers Cognitively Activating Instruction and Development of Students Mathematical Literacy project COACTIV COACTIV applies a broad innovative conceptualization of teacher competence to examine how mathematics teachers knowledge beliefs motivational orientations and self regulation skills influence their instructional practice and teaching outcomes In this project data was collected on various aspects of teacher competence and classroom instruction from the perspective of both the teachers themselves and their students Moreover it gauges the effects of these teacher characteristics on student learning as indexed by the progress students in each class Questions addressed in the study which are reported in this volume include What are the characteristics of successful teaching What distinguishes teachers who succeed in their profession How can the quality of instruction be improved
