Shifting Boundaries of the Firm

Mari Sako, 2006-04-06 All firms wrestle with restructuring involving consolidation of mergers and acquisitions on the one hand and fragmentation through outsourcing and spin offs on the other Through an in depth investigation into the organizational strategies of Japanese corporate management and union leaders in Japan Mari Sako explores the issue of organizational boundaries that arises from such restructuring Examining the strategy and structure of both businesses and trade unions the book draws upon empirical evidence drawn from interviews conducted at Toyota and Matsushita and their respective unions It examines their respective strategies in coping with organizational boundaries against the backdrop of changing labour markets and in the process challenges widely held notions about Japanese corporate and union structures Mari Sako goes on to explore the implications of these relationships in other advanced industrial countries for corporate restructuring jobs and labour market flexibility

Transforming logistics support for fast jets Great Britain: National Audit Office, 2007-07-17 Since 2003 the Ministry of Defence MoD has changed its arrangements for providing logistics support for its Harrier and Tornado fast jet aircraft by rationalising the activity and location of its maintenance and repair services The NAO report finds that these changes have reduced costs by a cumulative saving of 1.4 billion and although availability of the aircraft temporarily declined during the transition period availability targets for these fast jet aircraft are now being met The MoD has applied new techniques including introducing pulse lines similar to a production line used in the motor car industry which has led to improved productivity with fewer man hours and less workspace and spares holdings The MoD has also

entered into new partnerships with industry which are managed by teams made up of contractors and military personnel situated at main RAF bases The new arrangements are based on industry making available a specified number of aircraft or engines rather than on the number of repairs they carry out or the number of spare parts they provide The report identifies two significant risks that still remain relating to the provision of sufficient trained personnel to man the pulse lines for both jets and the supply chain to ensure the timely supply of spare parts for both types of aircraft
