

## Poison and Bone Necromancer

By: NoFX-CKY

Here is my strategy guide for my poison and bone necro, which, if built properly, can become VERY powerful. Note that in the beginning, it is relatively weak, and will be so until later in the game when the necro can learn his most powerful spells. Be patient, and you will have a Necromancer that will be both extremely powerful as well as very fun to play! While although the name is "Poison and Bone", we will, obviously, need to use some other skills. The following section covers on what skills I recommend for this build, as I will not say what is best in order to prevent a great deal of debate.

### Curses

The main curse in this skill tree is Lower Resist, which is necessary to make your P&B spells and Golem's attacks more effective.

Amplify Damage: Do not be tempted to put too many valuable skill points into it. It might, however, be good for the beginning of the game.

**Recommended Points:** 1 as a pre-requisite.

Dim Vision: Same as Amplify Damage. It is helpful against ranged attackers or enemies that tend to run away.

**Recommended Points:** 1 as a pre-req.

Weaken: Blah. Ignore putting but one point in this.

**Recommended Points:** Also only 1 as a pre-req.

Iron Maiden: This skill arises controversy. Many claim that it's the best curse, others think it sucks. I think its good earlier in the game with the BG/IM cheese trick thing, but supposedly that's going to be fixed in the up-coming patch ☹

**Recommended Points:** As many as you feel necessary for early use.

Terror: Ugh. Ignore.
