The Princeton Review

Negative Number Multiplication Flash Cards Negative Number Flash Cards Book 2:

Math, Grade 6 Katie Kee Daughtrey, 2016-01-04 Interactive Notebooks Math for grade 6 is a fun way to teach and reinforce effective note taking for students. Students become a part of the learning process with activities about absolute value, ratios, evaluating expressions, one variable equations and inequalities, surface area, and more. This book is an essential resource that will guide you through setting up, creating, and maintaining interactive notebooks for skill retention in the classroom. High interest and hands-on interactive notebooks effectively engage students in learning new concepts. Students are encouraged to personalize interactive notebooks to fit their specific learning needs by creating fun, colorful pages for each topic. With this note-taking process, students will learn organization, color coding, summarizing, and other important skills while creating personalized portfolios of their individual learning that they can reference throughout the year. Spanning grades kindergarten to grade 8, the Interactive Notebooks series focuses on grade-specific math, language arts, or science skills. Aligned to meet current state standards, every 96-page book in this series offers lesson plans to keep the process focused. Reproducibles are included to create notebook pages on a variety of topics, making this series a fun one-of-a-kind learning experience.

Principles of Mathematics Book 1 Teacher Guide Katherine Loop, 2016-08-05 Teacher Guide for Book 1 of the Principles of Mathematics Biblical Worldview Curriculum for junior high Math is a real-life tool that points us to God and helps us explore His creation; yet it often comes across as dry facts and meaningless rules. Here at last is a curriculum that has a biblical worldview integrated throughout the text, and problems not just added as an afterthought. The resources in the Teacher Guide will help students master and apply the skills learned in the Student Textbook. What does this Teacher Guide include? Worksheets, Quizzes, and Tests. These perforated, three-hole punched pages help provide practice on the principles taught in the main student textbook. Answer Keys: The answers are included for the worksheets, quizzes, and tests found in this Teacher Guide. Schedule A: A suggested calendar schedule is provided for completing the material in one year, though this can be adapted to meet individual student needs. There is also an accelerated schedule for completing the material in one semester. Are there any prerequisites for this course? This curriculum is aimed at grades 6-8, fitting into most math approaches the year or two years prior to starting high school algebra. If following traditional grade levels, Book 1 should be completed in grade 6 or 7, and Book 2 in grade 7 or 8. In Book 1, students should have a basic knowledge of arithmetic; basic arithmetic will be reviewed, but at a fast pace, and while teaching problem-solving skills and a biblical worldview of math and sufficient mental development to think through the concepts and examples given. Typically, anyone in sixth grade or higher should be prepared to begin. The focus of the course is actually learning math for life, not simply preparing to pass a test.
