Best and Safe Practices in Different Contexts of Neonatal Care R. Mauricio Barría, 2024-06-19 The field of neonatal care has been a long standing concern within the broader field of child health given the crucial role the neonatal stage plays in the development of individuals While many of the most effective practices in neonatal care have been widely disseminated across maternal and childcare units globally cultural and social differences as well as the availability of resources necessitate the adaptation of these practices to the specific contexts of each place This book discusses a range of crucial topics related to neonatal care over two sections It includes ten chapters that address pertinent issues in neonatal care The book's objective is to contribute to the clinical work of health teams in neonatal units by sharing content and lessons for efficient and safe care both from the global context of the configuration of the therapeutic environment to specific topics of usual care The chapters have been developed by specialists in neonatology from different countries and through them they hope to share part of their experience

Comprehensive Neonatal Care Carole Kenner, Judy Wright Lott, 2007-01-01 A comprehensive examination of neonatal nursing management from a physiologic and pathophysiologic approach The book features a complete physiologic and embryonic foundation for each neonatal system as well as coverage of associated risk factors genetics critical periods of development nutrition and parenting

Comprehensive Neonatal Nursing Care Carole Kenner, Judy Lott, 2013-08-21

This book provides a complete look at neonatal healthcare delivery. This edition includes discussions of contemporary topics of interest such as informatics, genetics, global health, and family-centered care, which are vital to providers caring for neonates today. The case studies and the evidence-based practice dialogues at the end of each chapter provide great opportunities for further reflection. The book is useful to a wide audience in nursing, including undergraduate and graduate nursing students, practicing neonatal and pediatric nurses, and advanced practice nurses who care for neonates. Score 92.4 Stars Doody's Medical Reviews. This classic has been thoroughly updated to incorporate the most up-to-date research findings and strategies for providing cost-effective and evidence-based care. New chapters address emerging infections, the late preterm infant, and neonatal care from a global perspective. Included are updated neonatal care protocols and procedures, neuroprotective risk factors, new treatments, and new trends in developmental care. Text integrates the Institute of Medicine's 10M five competencies, reflects the Affordable Healthcare Act, and the Robert Wood Johnson and 10M report, *The Future of Nursing*. The text continues to provide neonatal care from a physiologic and pathophysiologic approach with a major emphasis on nursing management at the bedside and advanced practice level. Each neonatal body system is presented along with EBM interventions to assist in understanding the why behind what is seen in the clinical area. Integrative management is threaded through the text along with extensive research findings to support practice strategies and rationales for sound clinical decision making. Topics of recent interest include iatrogenic complications, neonatal pain, use of computers or other technology in neonatal care, and neonatal AIDS. Case studies enhance understanding of both common and rare neonatal conditions. New to the Fifth Edition: New chapters on emerging infections, the late preterm infant, and neonatal care from a global perspective. Updated neonatal care protocols and procedures, neuroprotective factors, new treatment modalities, and new trends in developmental care. Tackles the UN Millennium Development Goals MDGs. Addresses the expansion of the nurse's role in the US and worldwide. Provides case studies that lead the reader through the identification, diagnosis, treatment, and evaluation of common and rare neonatal conditions.
