

NERVOUS SYSTEM

DEFINITION OF THE CENTRAL NERVOUS SYSTEM

As you think, see, breath, and do everything throughout the day you are using your central nervous system. It is the system of the body that receives and processes all information from all parts of the body. It consists of the brain, the spinal cord, and neurons. It is arguably the most important system of the body.

PARTS AND FUNCTIONS OF THE CENTRAL NERVOUS SYSTEM

Neurons are the basic units that make up the nervous system. All cells of the nervous system are made of neurons. Neurons are able to transmit electrical impulses throughout the body as signals that cause a response. There are three types of neurons, known as motor, sensory, or interneurons. Motor neurons transmit information between organs, glands, and muscles. Sensory neurons send information to the brain and spinal cord from internal organs or external stimuli encountered by the parts of the body. Interneurons act as messengers that relate signals between motor and sensory neurons.

The **brain** is the control center of the body. The brain is typically considered to have three main parts: the forebrain, the hindbrain, and the brain stem. The forebrain receives and processes sensory information such as thinking, understanding and producing language, and motor functions. The **forebrain** consists of the thalamus, hypothalamus, cerebrum, and cerebral cortex.

Endocrine System (Speedy Study Guides) Speedy Publishing, 2014-06-21. The Endocrine System is the body's bridge between nervous and glandular functions. All chemicals released in the body likely do so through an endocrine response. In order to design exercise, dietary and supplement regimens to aid the body's performance, a basic knowledge of the roles of each element of the Endocrine System is required. Illness and other physical maladies are most evident in the body through the performance of organs and glands. Endocrine System analysis and regulation is key to providing the best environment for a healthy body.

Human Nervous System (Speedy Study Guides) Speedy Publishing, 2014-06-21. The Human nervous system is the soft tissue conduit within our body in which signals from the brain travel to various parts of the body to perform specific functions. Some of these functions may be automatic such as breathing and others may be by the express intent of the individual such as typing on the computer. A chart showing the body's nervous system would help explain how signals are sent from the brain to various parts of the body.

Vitamins & Minerals II (Speedy Study Guides) Speedy Publishing, 2014-06-17. Vitamins and minerals are natural healthy resources from the ground and plant life. Without vitamins and minerals, our bodies would not function well at all. Without iron, our blood would not flow and without vitamin C, our immune system will slow. Calcium is an important mineral that the body needs; without it, we would have no bones and lots of heartburn. A chart that shows all the different vitamins and minerals would be beneficial to see for your health. Without a chart, you may not know any of these facts.

Medical Coding: Icd-10-Pcs (Speedy Study Guides) Speedy Publishing, 2014-07-16. ICD 10 PCS is a kind of medical coding that is used to identify what kinds of treatment a patient received and used for billing a patient. Medical coding requires a person to get an education and there is a huge amount of information a person needs to know in order to get a coding certification. One great way to learn the information is with the use of a study pamphlet. The pamphlet can be used to learn the basic information and can keep a student focused on what they need to learn.

Medical Terminology: Skeletal System (Speedy Study Guides) Speedy Publishing, 2014-07-18. A pamphlet on your skeletal system would be able to help medical students understand what the skeletal system is and what the term refers to. A pamphlet of this kind would dispel many of the misconceptions. Contrary to most people's definitions, the skeletal system is not just your bones. In fact, the skeletal system is all of the tendons, ligaments and the cartilage that connect the bones together as well as the bones themselves that comprise our skeleton.

Medical Coding (Speedy Study Guides) Speedy Publishing, 2014-05-04. When you are studying something as intricate, involved and structured as medical coding, it's worth your time to invest in every study aid you can possibly employ to that end. Since studying is just a way of working to ensure that you can better retain and recall information, a pamphlet is a great way to help you quickly decode various medical

codes While a deck of flash cards may seem useful using them for a practice such as deciphering medical coding means that you will need a very thick stack a pamphlet form study guide takes less space and similar information
