The Carbon Buster's Home Energy Handbook Godo Stoyke, 2006-11-01 Most people are unaware that environmental problems such as climate change can be easily avoided at a profit through the intelligent application of appropriate technology. The Carbon Buster's Home Energy Handbook describes how to achieve this goal in the residential field. The first book in North America to provide a detailed carbon accounting of a family's carbon emissions and how to reduce them, it systematically analyzes energy costs and evaluates which measures yield the highest returns for the environment and the pocketbook. It provides answers to questions such as: Which measure is more effective: putting solar panels on your roof or buying a hybrid car? Where do I need to invest first: in high efficiency shower heads or solar tubes? Is a 500-watt fridge that uses 800 kWh of power per year a good buy? The book allows individuals to quickly and accurately assess which products are a good deal and which aren't. It systematically analyzes residential carbon emissions and energy costs and prioritizes solutions based on highest carbon reductions and monetary returns, yielding results that are often surprising. The book enables readers to dramatically reduce their carbon emissions far below the levels targeted under the Kyoto Protocol. At the same time, readers implementing the recommendations will save an average of 15,000 in energy costs over the next five years. [The Arrival of the Electric Car](#) CHRIS JOHNSTON, ED SOBEY, 2022-12-29 Second Edition Are you considering buying an electric vehicle? All of us are witnessing a once-in-a-lifetime transformation. For over one hundred years, gasoline and diesel fuels have powered ground transportation throughout the world. Now that is changing, and 2023 is the year when most people will recognize that change is happening. This book is a comprehensive, easy-to-understand overview of the passenger EV universe, including guides for buying and owning an electric car. The authors discuss choosing, owning, and driving an electric car, then explain the features, advantages, benefits, and limitations of over 45 EV models, including pickup trucks, SUVs, and sedans. If you have to have a car, make it an electric car. As this book makes clear, they are better than old-fashioned vehicles in every way. Bill McKibben, American environmentalist and climate change authority, co-founded 350.org and spearheaded the fossil fuel divestment campaign, resulting in endowments worth more than 15 trillion stepping back from oil, gas, and coal. Thankfully, now that the electric vehicle R&D dark ages are coming to an end and automakers around the world are charging up their EV programs, there's no doubt that we're about to see massive, valuable change in our transportation landscape. Sebastian Blanco, one of America's leading electric car journalists, who has been writing about EVs since 2006. **Mechanical Engineers' Handbook, Volume 4** Myer Kutz, 2015-03-02 The engineer's ready reference for mechanical power and heat.
