Heterotrophic Activity in the Sea Peter J.LeB. Williams,John E. Hobbie,2012-12-06 Introduction This book contains papers given at a NATO Advanced Research Institute A R I held at Caiscais Portugal in November 1981 The subject of the A R I was marine heterotrophy this is defined as the process by which the carbon autotrophically fixed into organic compounds by photosynthesis is transformed and respired Obviously all animals and many microbes are heterotrophs but here we will deal only with the microbes Also we restricted the A R I primarily to microbial heterotrophy in the water column even though we recognize that a great deal occurs in sediments Most of the recent advances have in fact been made in the water column because it is easier to work in a fluid apparently uniform medium The reason for the A R I was the rapid development of this subject over the past few years Methods and arguments have flourished so it is now time for a review and for a sorting out We wish to thank the NATO Marine Science Committee for sharing this view F Azam A L Meyer Reil L Pomeroy C Lee and B Hargrave for organizational help and H Lang and S Semino for valuable editing aid *Preparation and Use of Weather*
